Hi,

I can send email marketing campaigns through your servers??

Can I send 200k per day?

Dragonvixs - July 20, 2022, 12:00 am

Hi,

If a sending protocol (SMTP) isn't embeded, how will Mass Email Marketing tool send mails?
It sound like they are not dedicatedly build for each individual, What are the possibilities sending protocols don't get bad easily?

Have not seen worse scam attempt, do not waste your money on these kind of products. Order quality SMTP from marketplace.

Yes its a scam, he just uses screenshots to show you his mailer, charges you for the program then deletes all the convos. I was scammed again on HF lmao good times. Gimme bytes for slapping my face for being a dumbass.

Noah u suck!
