Cyaniide - June 3, 2022, 1:28 pm

Some of the first things we all want to look for in an e-book to educate us in some sort of way to profit from are a few key things....Profitability?

The profit of this e-book is quite limitless really but difficult to explain the limitations unfortunately, However depending on your capital could range anywhere from 100\$-1000\$ a week in reality.

Black hat or White hat?

I would place this method under Grey Hat personally.

Saturation?

So long as everyone follows directions included in the book this should never really become saturated as I do not plan to sell too many copies to allow this to happen as I still use this method frequently myself.

Investment required?

There is a "Investment" or starting capital required but the return on investment is more or less 200% if performed properly.

Turn-around time?

The turn-around time will vary but if you have everything prepared as explained it should be no more than about 4-5 days depending on market.

What does it involve or is it related to?

This method does involve Amazon but I believe this is in such a specific way that I am certain has not been done before.

Why are you selling it so cheap when there's so much to be made?

With there being a capital requirement to begin I believe that discredits the value of the knowledge.

I will be selling it multiple times so in reality it will still be bringing me a significant income.

(May 31, 2022 10:28 AM)moneymo23 Wrote: [\[CITE\]](#) My Review:

I received a vouch copy from OP. As mentioned it involves Amazon. The PDF is an easy read and he provides a step by step of what to do. This is a well known strategy, just that OP is providing a twist to do with a specific product. You will need to do a "special task" in order for this to work. The OP claims it has worked for him, but there is no guarantee with these sort of things. I believe if you follow what the OP says you will have success. I personally do not feel comfortable with this, so I will not be doing. Also keep in mind that OP does not do this all the time, only every now and then. There is risk if you try and do too often.

Thanks for vouch copy.

Pricing?First 3 copies after the above vouch I am offering at just 25\$ each to get everything rolling

After those initial 3 copies it will go back up to 40\$.
