Thread: [\[#1\] NICEPROJECT.NET HVNC | 0/26 FUD | BROWSERS FULLY EMULATED \(WebGL 100%\)](#)

TheNiceCoder - June 4, 2022, 10:39 am

Hello guys, today I am releasing my Hidden VNC programmed in .NET. I noticed a complete lack of HVNCs being sold to the public, and so I have delivered a high quality one that is not pasted from TinyNuke. It supports all mainstream browsers, it is 100% FUD, it has a clipboard, and many more features to come.

Extremely cheap competitive prices will not stick around forever, I want to let people get a feel for the software.

1 Week: €70.00
1 Month: €120.00
Lifetime: €450.00

Once weekly packages have sold out I will no longer be providing them anymore, these will be my "vouch copies".

If you want to purchase through site, middlemans etc., please contact me directly.

You can purchase directly through me with any mainstream altcoin.

Contact me directly for inquiries regarding the source code.

HEAD TO [NICEPROJECT.NET](#) AND PICK UP A COPY TODAY BEFORE THEY ARE SOLD OUT!

Can you provide runtime scans from checkzilla on the software and can you give more information about what language it uses etc also you have to link your discord to your HF account to leave your discord tag in your thread

Programmed in .NET, the program does not use NtCreateVirtualDesktopEx or any other traditional API for HVNC. It essentially is a custom window manager with nothing special. It's highly unlikely, unless directly targeted in a focused manner by AV companies, that it will ever have a serious detection profile. The only real crime it commits is communication over tcp.?

Checkzilla as per request (sorry for the delayed response):

Yes of course, and I'll pay the middleman fee up to 10\$.

You seem reputable, I will totally allow you to use my product, on the condition that you pay after as long as the product has everything I have promised.

As far as "free" goes, I will not do this, because I am on a tight budget at the moment. I hope you understand.

You should give a vouch copy to someone who is trusted. That way people might see if this is real or not.

I Think he is not Able to respond because his profile says:-

"Due to policy violations this member has Limited Access"
