Thread: [Laravel Developer to finish project.](#)

Captain Morgan - June 5, 2022, 1:55 pm

Hey everyone.

So, I was getting a site built by another member on the site.
But sadly he chose [not to finish it](#), and the quality of the code isnt the best.

But it kinda works, for the most part.

I am looking for a developer with quite a bit of experience with Laravel, as my site is built with that.
The code is updated to Laravel 9.

The design of the site itself is 95% complete, so no major changes to that.

Right now I have the following tasks in mind:

- Implement an API to get prices on crypto tokens. (I have an API, you just need to implement it)
- Implement a charting library for said price data. (I also have a lib in mind)
- General bug fixing and testing of the system.

If this task sounds interesting to you, then feel free to send me a PM or start a Conversation.

I'm praying for someone here can help build the remaining part of my dream.

Payment can be in Crypto or Crypto + Partnership.

/Morgan

Brief me with more details in the PM or send me your Discord. I have experience with Laravel as well as with other MVC PHP frameworks. I can help finish the project.

Captain Morgan - June 9, 2022, 1:19 pm

Made an agreement with @Waffle.

So I am no longer looking for a developer.
