Thread: [MAKE MINIMUM \\$2000 PER MONTH OR REFUND \[WORKING WORLDWIDE\] - MY OWN METHOD LEAK](#)

Grindelwald - June 6, 2022, 4:27 pm

So in my mentorship I'm teaching people on how to start and run successfully their sports betting service and gain maximum profit out of it

I will get you through all the aspects on how to gain maximum out of it

Step 1: You need to be either a good tipster (or know a good tipster whose tips you can copy). I will let customers resell my tips (as you can see I'm advertising only on cracked.io).

Step 2: Launch your service. I recommend creating a Discord channel or Telegram One

Step 3: Structure your Payment plan- there are a few options on how you could charge your customers. The most famous & recommended one is - weekly/monthly/lifetime memberships

An example Payment Structure :

\$20 Weekly

\$50 Monthly

\$300 Lifetime

Step 4: Order GFX, will be nice if you can afford investing in some GFX as it will look your service more fancy (Thread design+ signature)

Step 5: Open your service (I recommend starting on some forums). I will make you a list of forums you can use

-Take on mind I deleted the forums part as it's not allowed to advertise other forums in HF

Step 6: Once you created your thread, I recommend giving few vouch copies

Step 7: Once your thread/group are ready there are few very important things to do (in order to boost your income)

-Add all your referral links on the thread (to gain commissions from your customers)

here are sites offering referral commissions

-stake.com

-duelbits.com (very good ref program)

-sportsbet.io

You can purchase some signatures which will help you advertise more

Sticky is recommended too

Now you have your service ready

There are few other good ways to advertise it

Step 1:

-Create Tik Tok account where you post daily free bets (make sure to have your Discord server link under each video and in your profile BIO)

-Create Instagram account and make daily posts with free tips and show your winnings (again your link is implemented)

You can buy some followers and views for each of these to look like your service is bigger

Another good thing you can do is advertise on Youtube the same way because you could earn from views there too

Now from there, scaling your service will work by having your own website (but for this you would need more solid budget)

I can tell you blackhat part of how many tipsters are earning fast money (not recommended to do)

but can share it with you

What they do is, they tell their customers they have fixed game

Let's say odd for team 1 is 2.20

for x is 3.50

for team 2 is 2.70

What they do is tell

Customer A- to bet on team 1

Customer B - to bet on Draw

Customer C- to bet on team 2

This way they have secure customers who will buy game again (because they will earn)

So let me know when you read it

We will have to

First and most important - Find a name for your service

Second- Create a Discord server as you need one to provide tips there

3rd- Get you thread design and signature (I have gfx artist working for me)

There is a person with 3 letter username selling this currently for \$1500 so you better get it for free here.

I was never going to leak it but since one guy stole it and is selling it in the Premium Sellers section for \$1000+ I decided this is the best thing to do.
