How to i find the admin of a telegram channel from which i have no information

Suppose we have only one admin username and that is fake too.

Please share your amazing ways to find Telegram Channel Admin in full detail

Thanks for your reply.

If the username is fake and the the person you want to find has at least basic OPSEC then there is not much you can do. Pretty much you will have no luck in finding any other personal informations

use telegram leak records, question the fake username, you probably think it's fake because it changed later
