Thread: [WeLeakInfo V2 Domain Seaized](#)

juggenskonton - June 7, 2022, 11:02 am

WeLeakInfo.to (version 2) has also been seized after running for over a year.

Will there be a v3 aswell or is this the end of weleak? :)

Im pretty sure another will pop up.

If not using a normal domain, then a decentralized domain or a onion.

I believe so aswell. Will just take some time. The owner of V2 just left Telegram when the domain got seized and has not been online ever since.

This is a cycle that will forever repeat, one gets seized, a new one pops up. It is a cycle.

Just keep making new free trials, you don't have to pay the 2000\$ a year, unless you are in the career and have the funds for it.

I remember when WLI was the number one DB search engine besides dehashed. I do think that there will be another, the thing is it wouldn't have all the DB's because WLI had uncirculated DB's that no one can get. It be cool to see another one but at the same time it's rinse and repeat.

How do you get a free trial? I don't see it being mentioned on the website. At least, for me.

Edit: Ah, it gets applied automatically on sign-up.

The owner of version 2?

I know the owner of version 1 got 2 years prison sentence or something. I believe it was in France or Italy though. I might be wrong.

I also signed up and received the trial. But I am unable to find emails + passwords. It requires me to have PRO version to see it.

Raidforums was my favourite until that got seized by the FBI
