Premium Private HANDMADE Crypts

Hello! Welcome to my thread. I would like to share my private crypting service which supports .NET and Native x64 or x86, DLL or EXE.

I spent my time getting this method to work flawlessly, and I am currently using it in my spreading campaigns with a decent 15-20 days FUD, maintaining 0/26 on Antiscan for more than 3,4 weeks. If you want to spread your RAT or miner, and you want it to bypass Windows Defender 100% of the times, this is your crypt. Once you beat WinDef and you are in the user's PC, you stay there lifetime, because of the exclusions made at execution time.

I guarantee scan time and runtime bypass for Windows Defender. Also, it will bypass AVG, Avira, McAfee, Kaspersky and many more at runtime almost always. Anyway, my main purpose with this crypt is getting past WD since it is the most used AV out there.

Private Crypt Included Features:

- FULLY SILENT UAC Bypass, works on all recent Windows (7,8,10,11). Different method for each client.

- Every build is unique and different, made by myself manually in C/C++.
- Memory injection in a legit Windows Process without any detections.
- AMSI Bypass and ETW Patch.
- Creates Windows Defender Exclusions.
- Native & .NET supported.
- x64 and x86 Payloads.
- Random Execution Delay.
- Heavily obfuscated.
- Silent Startup and Persistence if needed as well - Ask for it when sending your file.
- Stub size, 450kb-3500kb. I can copy any assembly and icons.
- Pump your file - Just tell me the desired final size for your file.
- Quality support included!?

I will offer 2 vouch copies to TRUSTED MEMBERS only. You must have been around the forum for at least 1 year and have good rep.

Vouch left : 0/2

Vouches given to @NotKover and @Romanus.

1 Premium Manual Private Handmade Crypt: \$499 \$250 (until 14/01/2023)

REFUD build within 30 days : \$200

Payment methods: BTC,ETH,XMR,LTC and other cryptocurrencies

If you recommend my services to a friend, both of you get a total of 50\$ discount, 25\$ for you and 25\$ for him, for the Next New Crypt Build

Get the best crypting service today and stop wasting money on public or not-that-"private" stubs.
[contract=tid]Start Contract[/contract]

You can contact me trough PM or trough Telegram. [Press here](#), and it will take you to it.

I've crypted these in the past and worked 100% with my crypt:

- Pure Miner (A LOT OF TIMES) and many other miner that is native or net, just ask me. I tried as well UnamSanctam Miner, which is public and outdated, and got 0/26 and 1/30 runtime (it was a generic shitty detection), WD 100% bypassed all the times.
- Warzone Rat, BabylonRAT, AsyncRAT, VenomRat,remkos and many other public rats gets past Windows Defender and most AV on runtime without problems.
- Amadey client.
- PerpekIs Rat
- Line, if you know what I mean
- Will be adding more...

I am interested in long term business relationships, if you tested my services and liked them and keep repeating, I will lower the price on every build, so you win, I win.

Thank you for taking the time to read my post, if you have any questions, hit me up.

TERMS OF USE

- I reserve the right to accept or refuse any build by any reason before accepting any payment.
- Make sure your file is working properly before sending it to me.
- Scanning is ONLY allowed at NO DISTRUBUTION sites. Scanning on VIRUSTOTAL or any scanner with Distribution ON is not allowed, and will make me not accept any more contracts from you. A part from not accepting more contracts, any crypt you might have bought, will not be elegible for a refund, not even for REfuds. You've been warned.
- No sales-thread trash posting is allowed. If so, I will deny any further builds. If you have issues and need support, I am available almost 12/7 on Telegram, feel free to contact me and we will get to the botton of the issue and solve it.
- Reversing of the file is forbidden.
- All sales are final, no refunds. I am not responsible for any misuse you can give to the file.

MY CLIENTS AND MY PRODUCT QUALITY ARE WHAT MATTERS TO ME THE MOST
Most recent reviews are down, I have been adding them as the users have been sharing their experiences.

(Jun 14, 2022 06:19 AM)NotKover Wrote: [\[CITE\]](#)

I got a vouch copy of a crypt from Lemon and this is my review,

File info:

Loader known as amadey, 32bit and native

Amadey modules enabled:

Dropper

Autorun

stealer

screenshot

Crypt scan results:

<https://www.checkzilla.io/scan/a1318c3e-ed55-4d08-8676-246dae701c9f>

Personal notes:

The seller Lemon was very nice and made sure that the crypt was setup perfectly and connecting to my amadey cnc, the file he provided to me was perfectly working and silent with no AV warnings or UAC prompts including for the amadey dropper(many crypt providers struggle with it somehow), i am recommending him for crypts because the crypt he provided me was very high quality and had no issues and is definitely worth way more than his current selling price and i will be a very frequent customer.

(Jun 13, 2022 01:44 PM)\$ZEUS Wrote: [\[CITE\]](#)

Vouching for lemon here, got him to crypt PureMiner and his turn around time was great. UAC bypass and everything is working as expected. Good service, will be back.

(Jun 17, 2022 09:39 PM)suduspoon02 Wrote: [\[CITE\]](#)

hi,

Bought and use currently. I can say base on my experienced in wasting money buying private crypter. I can tell you this private crypting are really worth to purchase because most of private crypter i bought will have issue related with runtime and even can only last 24 hours before detection. Most important THE SUPPORT provided are so GOOD and He shown QUALITY his main objective. i guess i will use your service afterward. Hope to have a long term.

(Jun 22, 2022 01:56 PM)Romanus Wrote: [\[CITE\]](#)

Hi, so awhile ago i received a vouch copy. first off, i would like to apologize to Lemon here as for some reason (which i am looking into) my account was temporarily suspended. but without further ado, i can say i am excited to review this service, and here is my UNBIASED review of lemon's Crypting service.

[+] Quality so first off talking with lemon was very nice.

he is a easy chap to chat with. but that's not what this section is about. I gave Lemon 2 files to bind & crypt to really put his crypting services

to the test, the files in which i binded & crypted were Smoke Loader & PureMiner which were both privately crypted

by some other chaps. here are the scan results of those files individually:

PureMiner: <https://checkzilla.io/scan/2d6317f3-25d8-4b2a-8928-addc24e377b5>

Smoke Loader: <https://checkzilla.io/scan/54b551ba-388c-49dc-8530-a6515b70f76b>

why am i posting these? well, since this now counts as a dropper, with 2 files being executed, sometimes the acts of droppers simply dropping files are deemed Malicious if not properly crypted or obfuscated. i can say here i had no issues with RT & ST with the file i was given from Lemon, which only 2 detections overall. <https://checkzilla.io/scan/2d6317f3-25d8-4b2a-8928-addc24e377b5>

for quality, i am giving this a 10/10 and here's why:

1. the seller was able to go above and beyond with my request of binding 2 files regardless if its stated in main posts.
2. seller was patient with me even through a temporary suspension.
3. seller's product is very well made with a miniscule 2 detections.

[+] The Seller & Pricing

Although i talked about the seller a little bit above, here's a few things i didn't mention: the seller seemed more then happy to give out vouch copies, which is a great sign for a new service.

the seller can be trusted not just through his product, customer service, but his connections through the HF community. can say it was a smart move by lemon giving Kover a vouch copy.

PRICE! this is the only concern i would say. this service is wonderful, and it definitely looks like it has a place on HF. but 175\$ feels like a bit too much. i wont name names, but other crypting services are ranging between 25 - 120ish here. if price was adjusted I'm sure it would be swarming

with customers right now.

Regardless, this service is still worth it. and for the seller, i give him a 9/10, and his pricing a 7/10 overall, I'm rating this service a 9/10 because i see potential here.

As always,

Best Regards,
~Roma

(Jun 30, 2022 09:38 AM)Willy Robinson Wrote: [\[CITE\]](#)

I placed an order with justamelon and what I can say is that he is very professional and focused in his work.

Its encryption service offers good features, it answers all questions and is very fast!

Once the file was received, he sent me all the information necessary for its proper functioning, as well as a video proving that the file bypasses Windows Defender well in addition to a scan with a detection of 0/26 !!!

I had no complaints, I immediately tested the file on my VM and my PC and received the client well using Venom RAT, everything is perfect and no editing needed!

Moreover, before the payment he was even able to check if he was able to encrypt the file and if there would be any problem, which is once again a proof of professionalism.

As for the price, I have no complaints either because it is a handmade and tailor-made encryption.

Thanks for your crypting service!

(Jul 2, 2022 04:27 AM)scarface2347 Wrote: [\[CITE\]](#)

Hello

I have bought 2 crypts. The boy takes the job very seriously. Very professional. He has a lot of patience and he answers you for all the doubts you have. I recommend it.??

(Jul 9, 2022 09:28 AM)ph4z3d Wrote: [\[CITE\]](#)

Really awesome work, bought 2 crypts from seller. Both are working and in great shape. Awesome to work with and I will definitely be using sellers services moving forward.

(Aug 4, 2022 03:19 PM)Dishh Wrote: [\[CITE\]](#)

Bought a crypt from lemon and can honestly say it's worth the money he helped me after he send it a lot and I made a mistake and he refud it for me right away. If you want a HQ FUD crypt you should buy it here.

I will definitely buy a crypt here again.

(Aug 16, 2022 12:22 PM)Sicario P Wrote: [\[CITE\]](#)

after searching and spending many dollars with other cryptors in this forum that I will not mention, I found this good job

After a week i want to leave review

He really cares about customers which is big problem in market today.

Defender and some main AVs still bypass SC/RN after a week

Very High quality crypt.

Thanks for your service

(Sep 8, 2022 02:47 PM)anoncrab Wrote: [\[CITE\]](#)

I am going to leave my honest opinions and thoughts of the crypting experience I had here.

Number one: He was very quick to respond to my messages, and had great customer service. He answered all of my questions and concerns.

Number two: He asked for everything that I wanted to be done to the file, startup/install, persistence, etc., and helped confirm any doubts I had about anything.

Number three: He seemed like a high quality member, and when he first started this thread he gave a vouch copy to another trusted member, which is a good sign for somebody who is starting a sales thread.

Overall, I rate the support and customer service a solid 10/10. I've tested the file on my main PC and it bypasses Windows Defender, and he also sent me a link to a checkzilla scan, with FUD results, which is great for spreading.

Definitely would recommend, and will be back again to do more business in the future. ?

(Sep 25, 2022 08:17 AM)MarekT Wrote: [\[CITE\]](#) What a guy, there was some stress with my file and the functionality, but he took his time and met all my requests and requirements until the end!

Now I have a working crypt for a good price in my eyes - if you are looking for a fast and reliable vendor to make you private crypts, choose him, you won't regret it.

I did a Checkzilla scan myself after I got the crypted file and it's completely clean!

(Sep 30, 2022 12:23 AM)sad Wrote: [\[CITE\]](#) I strongly recommend getting your files encoded by justalemon. He got 2 files ready within 48 hours, he is so friendly :)

(Oct 3, 2022 02:18 PM)IncognitoSQ Wrote: [\[CITE\]](#) Vouch for this guy, I bought a private crypt for PureMiner. He responded instantly when I talked to him on Telegram and he delivered file in 24 hours, Very easy to talk to and the file is FUD

(Nov 30, 2022 04:56 PM)moneymagnet Wrote: [\[CITE\]](#) OP guy, he answered to all my questions and helped me with some OP information. Bought a crypt and he delivered FUD crypted file in some hours. I would suggest him to all who wanna buy a crypt for file.

NotKover - June 7, 2022, 5:24 pm

If my account meets your criteria, ill take a vouch copy for my amadey bin, also what lang is the stub coded in and is it required for admin to be prompted every time?

justalemon - June 7, 2022, 7:31 pm

Hi there! Yeah, I see you are a rep member, so why not, contact me and send the file over for a vouch copy.

Regarding your questions :

1. Language is c++
2. Yes, it is required atm. I will be changing that in a few days, so no admin is prompted.

Thank you.

jmark7 - June 8, 2022, 5:13 am

Can recommend NotKover for a vouch copy.
been around for long.

justalemon - June 8, 2022, 10:00 am

This product looks interesting. Please check PM

Camarade - June 30, 2022, 9:38 am

I placed an order with justamelon and what I can say is that he is very professional and focused in his work.

Its encryption service offers good features, it answers all questions and is very fast!

Once the file was received, he sent me all the information necessary for its proper functioning, as well as a video proving that the file bypasses Windows Defender well in addition to a scan with a detection of 0/26 !!!

I had no complaints, I immediately tested the file on my VM and my PC and received the client well using Venom RAT, everything is perfect and no editing needed!

Moreover, before the payment he was even able to check if he was able to encrypt the file and if there would be any problem, which is once again a proof of professionalism.

As for the price, I have no complaints either because it is a handmade and tailor-made encryption.

Thanks for your crypting service!

justalemon - June 30, 2022, 3:42 pm

Thank you very much for your kind words bro. Yeah, I really do care about giving a great service and an even better support for any of my products, I will always do, I think that makes a huge difference, and it's lacking pretty much here on HF.

Looking back to all my purchases here, I had encounters with very good sellers which actually gave a great service and a great customer support. But sadly, in the majority of the cases, had very bad experiences and sellers were very sour and explanations very poor. I would love to be a part of that little percentage that do the things as they should be done, giving the client a good before and after-buying experience.

Again, thanks for the kind words, and I will make it back to you if you do really send some people from time to time.

"A Lemon always pays its debts"??

Cheers bud ?

(Sep 2, 2022 01:46 PM)Hack1 Wrote: [\[CITE\]](#) i will buy it but i dont have a good RAT , do you recommend one for me? thanks

Hi there buddy! Write to me on telegram, and I will recommend to you some I crypted in the past and worked well. Anyway, you can go ahead to the Premium Tools MarketPlace forum and you will find many of them. Any NET or native rat is ok, actually all the rats at hackforums can be crypted, so yeah, pick yours bro. Let me know if there is anything else I can help you with.

Hack1 - September 3, 2022, 11:44 pm

Thanks for your response, I haven't use a rat in 5 years , I used to have a NO_IP DUCK account but that went bust , can you recommend something similar that works I want buy worzon RAT AND WILL IT WORK IF I AM ON WIFI? THANKS ALOT

justalemon - September 4, 2022, 12:55 am

(Sep 3, 2022 11:44 PM)Hack1 Wrote: [\[CITE\]](#) Thanks for your response, I haven't use a rat in 5 years , I used to have a NO_IP DUCK account but that went bust , can you recommend something similar that works I want buy worzon RAT AND WILL IT WORK IF I AM ON WIFI? THANKS ALOT

I think before you buy it you should get informed about how RATs work and where they can be safely setup. I will do the encryption, you just need to have a little more info about how you are going to get ready your server, and you can find plenty of info around HackForums. Go ahead, I will be around

fara2020 - September 4, 2022, 3:29 am
hello you crypt apk android rat?

justalemon - September 4, 2022, 6:02 am

As you can see in the thread bud, only exe or dll. If your output matches that file extension, then it's ok.

New full update of the technique, new UAC ByPasses, it still gets past Windows Defender 100% of the times.

Get your FUD HQ Crypt here. Ask me if you have any questions prior to the purchase.

Learnin - September 8, 2022, 1:50 am

Just finished up buying a crypt from justalemon and the crypt I got was fully undetectable. I would say if you're looking for a crypt that will last you, this is the guy to go to!

anoncrab - September 8, 2022, 2:47 pm

I am going to leave my honest opinions and thoughts of the crypting experience I had here.

Number one: He was very quick to respond to my messages, and had great customer service. He answered all of my questions and concerns.

Number two: He asked for everything that I wanted to be done to the file, startup/install, persistence, etc., and helped confirm any doubts I had about anything.

Number three: He seemed like a high quality member, and when he first started this thread he gave a vouch copy to another trusted member, which is a good sign for somebody who is starting a sales thread.

Overall, I rate the support and customer service a solid 10/10. I've tested the file on my main PC and it bypasses Windows Defender, and he also sent me a link to a checkzilla scan, with FUD results, which is great for spreading.

Definitely would recommend, and will be back again to do more business in the future. ?

Learnin - September 8, 2022, 5:11 pm

So I just wanted to reply with this:

I received a perfectly good crypt from lemon and it was fine after a few tries to get it perfect. I got a PM from someone else who bought this and showed me this video: <https://vimeo.com/747661158>

In this video the file he crypted beats runtime of defender just fine, the error that is popping up is coming from an unknown developer.

I wanted to post this because I have just seen how much of negative response was posted.

I had a good service.

RUNTIME AND SCANTIME BYPASSED

Premium Private HANDMADE Crypts

Hello! Welcome to my thread. I would like to share my private crypting service which supports .NET and Native x64 or x86, DLL or EXE.

I spent my time getting this method to work flawlessly, and I am currently using it in my spreading campaigns with a decent 15-20 days FUD, maintaining 0/26 on Antiscan for more than 3 weeks. If you want to spread your RAT or miner, and you want it to bypass Windows Defender 100% of the times, this is your crypt. Once you beat WinDef and you are in the user's PC, you stay there lifetime, because of the exclusions made at execution time.

I guarantee scan time and runtime bypass for Windows Defender. Also, it will bypass AVG, Avira, McAfee, Kaspersky and many more at runtime almost always. Anyway, my main purpose with this crypt is getting past WD since it is the most used AV out there.

Private Crypt Included Features:

- FULLY SILENT UAC Bypass, works on all recent Windows (7,8,10,11). Different method for each client.
- Every build is unique and different, made by myself manually in C/C++.
- Memory injection in a legit Windows Process without any detections.
- AMSI Bypass and ETW Patch.
- Creates Windows Defender Exclusions.
- Native & .NET supported.
- x64 and x86 Payloads.
- Random Execution Delay.
- Heavily obfuscated.
- Silent Startup and Persistence if needed as well - Ask for it when sending your file.

- Stub size, 450-650kb. I can copy any assembly and icons.
- Pump your file - Desired final size for your file.
- Quality support included!?

I will offer 2 vouch copies to TRUSTED MEMBERS only. You must have been around the forum for at least 1 year and have good rep.

Vouch left : 0/2

Vouches given to @NotKover and @Romanus.

PRICING

Price per build: \$129 (Manually private crypted stub)

Price per 2 builds: \$199 (Manually private crypted stub)

Price per 3 builds: \$259 (Manually private crypted stub)

Price per 5 builds per month: \$459 (Manually private crypted stub)

REFUD build within 30 days : \$89

Payment methods: BTC,ETH,XMR,LTC and other cryptocurrencies

If you recommend my services to a friend, both of you get a total of 50\$ discount, 25\$ for you and 25\$ for him, for the Next New Crypt Build

Get the best crypting service today and stop wasting money on public or not-that-"private" stubs.

[contract=tid]Start Contract[/contract]

You can contact me trough PM or trough Telegram. [Press here](#), and it will take you to it.

I've crypted these in the past and worked 100% with my crypt:

- Pure Miner (A LOT OF TIMES) and many other miner that is native or net, just ask me. I tried as well UnamSanctam Miner, which is public and outdated, and got 0/26 and 1/30 runtime (it was a generic shitty detection), WD 100% bypassed all the times.
- Warzone Rat, BabylonRAT, AsyncRAT, VenomRat,remkos and many other public rats gets past Windows Defender and most AV on runtime without problems.
- Amadey client.
- Perpekls Rat
- Line, if you know what I mean
- Will be adding more...

I am interested in long term business relationships, if you tested my services and liked them and keep repeating, I will lower the price on every build, so you win, I win.

Thank you for taking the time to read my post, if you have any questions, hit me up.

TERMS OF USE

- I reserve the right to accept or refuse any build by any reason before accepting any payment.
- Make sure your file is working properly before sending it to me.
- Scanning is ONLY allowed at NO DISTRUBUTION sites. Scanning on VIRUSTOTAL or any

scanner with Distribution ON is not allowed, and will make me not accept any more contracts from you. A part from not accepting more contracts, any crypt you might have bought, will not be eligible for a refund, not even for REfuds. You've been warned.

- No sales-thread trash posting is allowed. If so, I will deny any further builds. If you have issues and need support, I am available almost 12/7 on Telegram, feel free to contact me and we will get to the bottom of the issue and solve it.
- Reversing of the file is forbidden.
- All sales are final, no refunds. I am not responsible for any misuse you can give to the file.

MY CLIENTS AND MY PRODUCT QUALITY ARE WHAT MATTERS TO ME THE MOST

Vouch for this guy, I bought a private crypt for PureMiner. He responded instantly when I talked to him on Telegram and he delivered file in 24 hours, Very easy to talk to and the file is FUD

justalemon - *October 10, 2022, 11:32 am*

I am still offering high quality crypts at a very low price. Don't hesitate to contact me if you have any questions.

Cheers

Sticky Bot - *October 16, 2022, 2:19 pm*

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on 10-30-2022. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).

justalemon - October 16, 2022, 4:06 pm

Just made a quick private stub and checked it on CheckZilla. I uploaded the results below.

Stanley - October 22, 2022, 6:20 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Palac10 - October 27, 2022, 1:51 am

In general how long do these stay FUD under large scale spreading

justalemon - October 27, 2022, 3:34 am

(Oct 27, 2022 01:51 AM)Palac10 Wrote: [\[CITE\]](#) In general how long do these stay FUD under large scale spreading

In Hq large spreading campaigns FUD time is around 2-3 weeks. Cheers ?

NotKover - December 6, 2022, 8:00 pm

I have been using lemon for crypts for awhile now and have loved them, my previous crypt has had over 15k installs on it before it started to go bad but is still UD with WD, my botshop is living proof of that. will continue to use crypts from lemon for a long time 69/10

doggolingo0x00 - December 8, 2022, 2:37 pm

Probably the best expert on crypting in the forum - you get what you pay for

Will definitely work with op again ?

interbellum - December 8, 2022, 3:08 pm

Here is my honest review of OP his crypting service.

First of all, I would like to state that I have major respect for him.

OP is really friendly, respectful and is always up to fix issues if there are any. OP actually knows how to do business, instead of the sellers nowadays that get mad when you ask them a question. Really HQ seller.

About the crypt, it's AMAZING. 10/10.

UAC + Windows def bypass is working 100%, no UAC popups or whatever and it gets added right to exclusions, as OP states that in his thread. Also the fun thing is, that it bypasses other AV's on

runtime aswell. I had 0 problems using his crypt and still enjoy it since it still bypasses windows def :-). Even got bots using Avast!

This is the crypt you want, not some public crypters that have shared stubs and get fully detected in 1 day.

GWLS! 10/10, highly recommend.

justalemon - December 10, 2022, 8:42 am

Prices will be increased forwarding the next week. Grab your crypt before it's too late.

SIM-5284310 - December 16, 2022, 2:15 pm

I bought one build through Telegram. the output is FUD now and i'll check the expire date and gonna request ReFUD or another build. his feedback and service was so nice and professional!

Have to update them scans, but all the stubs I am doing right now, are all green on checkzilla either scantime or runtime. Gotta post some new scans soon so you all have a glance at the quality.

Cheers to all and have a very nice 2023 full of happiness and health ?

p3refect - December 31, 2022, 7:21 am

If you're in need of top-notch coding services, look no further than justalemon. This professional developer completely exceeded my expectations with his expertise, transparency, and dedication to customer satisfaction.

From the start of our project, justalemon was responsive and dedicated to delivering exactly what I needed. He was able to create a software that bypassed all obstacles and the end result was exactly what I was hoping for - stable, reliable, and 100% effective in solving my issues.

Even when personal issues arose and caused delays, justalemon was transparent about the situation and worked hard to complete the project as soon as possible. The support I received was outstanding, with justalemon even going above and beyond by recording a video to explain the entire compilation process and source code.

In my honest opinion, justalemon is the ideal developer - skilled, professional, and committed to delivering high quality work. I have no reservations in recommending his coding services with complete confidence.

PS: Best crypt too

justalemon - December 31, 2022, 5:09 pm

This crypt, you can't compare it to any other here on HF, at least on the public marketplace. Again you may find it expensive but it again depends how you monetize after all this investment. If you get 10 install / day of course you may find it expensive, but you pay the quality so you can still hold that soft being a slowly downloaded way more longer without having to worry about his detection. Add it a launcher (GUI) and you are good to go for a long ride.

AnonymousRAT - January 2, 2023, 4:45 pm

I have bought alot of crypts before and have been dealing with him for over 5 months, indeed you cant compare the crypt from lemon to other crypters on HF, but you can compare with other forums. In my opinion \$130 was a fair price for the crypts he delivered and the price change is very bad for his business, but its his business so I wish him goodluck with it.

justalemon - January 3, 2023, 2:10 am

Quality improved in the last month. You bought two crypt many months ago, so again, I think you must be talking about older versions of my stubs. Thing is that it felt useless to create another different thread because of me updating the way I do them crypts to a much smooth and better way for the client. That is up to your judgment and if indeed you get a new crypt nowadays and you see quality is same, well then I would agree with you logically. Have a great day.

Edit: actually you bought only one crypt at this date 09-07-2022, 08:12 PM so please be serious sir. Thanks

AnonymousRAT - January 3, 2023, 10:12 am
