The last method similar to this lasted 8+ months and had 100 times the people using it than this one.

It should be fine for a while.

You can do this on your Mac

Ever Flow - July 18, 2022, 4:24 pm

So I paid for this guy when he did provide blackhat activity. I ask for a refund and he refused even though in his own thread it said no refunding at the time. He then starts lying about how refunding doesn't affects restaurants when it says on uber that they take the fund from the restaurants.

Then I messaged him recently for any type of update that he's making on this thread or for a different delivery method.

He dead ass tells me that since he got banned on HF he's not updating people(well clearly he got unbanned)

I already paid for his shit though so literally just dealing with someone with no integrity whatsoever.

The method is PUBLIC and his twist was ILLEGAL and BLACK HAT then he LIES about it being fine and told people to refund abuse. I can't vouch for his "updated" method because he doesn't actually update his old customers he just saying shit to get people to buy.

So if it turns out the new method is illegal and black hat as well then no refunds and no updates. I've dealt with some petty and poor ass people but I never met someone holding out updates that they can provide for free.

What dude?

I provide updates for those who purchased the Uber Eats method, for the Uber Eats method. You're the only customer that has complained after literally 20+ people have purchased this. You asked for a method for a different service, which I was going to provide for people who purchased UE originally, but I got banned and sales stopped so I decided to keep it for myself. On top of that, I found out that talks of that delivery service isn't allowed on HF, so I cancelled that plan entirely to avoid breaking the rules, and I don't even sell it here.

It is not illegal and blackhat, and I provide every customer with updates. I'll go ahead and ask some of them to post vouches since you just ruined my thread, lol!

Ever Flow - July 18, 2022, 11:03 pm

This is a good example of someone who doesn't understand what's legal and what's illegal.

You saying you sold to 20+ people actually makes it way worse because refund abusing is ILLEGAL.

Before I bought I said in advance that I already knew how to get 20\$ off since that's public. You said your twist makes it free which turns out to be refunding. Then you tried to justify by saying that technically making a new account to take advantage of the discount is illegal too. It's only 50\$ so I dc about disputing you over it but it's just funny when the thread says the method doesn't involve refunding when in reality the only twist was to refund.

So by your own logic - making new accounts is illegal as well I'm not sure how you can sit here and say that your shit is legal?

Regardless 100 people can come here and vouch doesn't change the fact that you were just telling people to just refund their orders....

Doesn't change that you basically scammed and sold me a public method

I wonder what's the update is? Mug the driver before they reach your house so they can't deliver your order and get free food(legal!)

But yeah this is my last post on it not really trying to debate.

I also didn't "ruin" your thread. You ruin your own thread.
