offering vouch copies? GLWS

jamsensei - June 10, 2022, 1:17 pm

(Jun 10, 2022 01:07 PM)Milk Wrote: [\[CITE\]](#) offering vouch copies? GLWS

First of all, thank you for leaving your opinion on the topic I can give you Vouch you can review honestly I always stand behind my software.

Milk - June 11, 2022, 1:19 am

Above pictures show what's happening, he send me some shitty detected out the ass public malware binded to his crypter that's simply a C# gui with a shitty stub(better than his other accounts since this time he actually got the crypter to do something)

As said in last message if anyone wants the file to examine themself convo or pm me, he has packed it with some shitty public crypter (40 detections scantime) so I couldn't tell what exact malware it was at first glance but was dropping two other files and creating its own process on startup when ran aswell as a bunch of other obvious shit. What was also hilarious is that the owner scanned his own file on virustotal yesterday right after he compiled. Something no competent crypter dev would do, nor anyone who has basic knowledge in malware. He has spammed me a bunch of shit just now and has said he needs a different file for a test crypt since the crypter itself that I gave him to crypt has already been crypted? I waited a bit after I sent a new file and he read it, sent a follow up "?????" Several minutes after and he has also read that and not responded for 20

more minutes. So safe to say he's a scammer spreading some public shitty malware that he can't even crypt himself and has no clue what he's doing!

GG

Several other users have dmd me off this message saying he's scammed them aswell and runs around on new accounts all the time scamming, this is my vouch copy review!

-This is my review based off my vouch copy contract which I can give proof of, though the user deleted the contract after I made my review so I couldn't rate him badly

Basilisk - June 11, 2022, 3:12 am

Would love to take a vouch copy, got some new software.
GLWS!

OdysseusGod - June 11, 2022, 5:43 am

Best Regards,
~Roma

yes there is still vouch copy you can create a contract and contact me via Telegram thanks :)

Basilisk - June 13, 2022, 7:46 am

OP was kind enough to provide me a vouch copy.

The GUI is very easy and noob friendly, and have all the options you gonna need.
Crypter supports many types of payload as I tried stealer, miner, rat and clipper and they all were working great.

Runtime and scantime are good, stub gets updated often.

The seller is very friendly, helped me a lot and very professional.

Software is solid and worth the price, I would recommend.

jamsensei - June 14, 2022, 1:08 am

Yes, Contact me

NotKover - June 14, 2022, 3:43 am

If you want to do a vouch crypt of your protector i can do a runtime scan of my crypted amadey bin using checkzilla

xHeaven - June 14, 2022, 10:08 am

I got a vouch copy from OP.

The crypter is good, it does exactly as advertised - code-wise, it could be improved in my opinion, but overall, I like it. The execution method (the way it works) is pretty unique.

UI-wise, it's pretty simple, looks exactly as it is advertised. Some improvements could be done here as well (successful crypt prompt text glitching out of the message box for example), but really it's just nitpicking.

Support-wise, I've got every detail that I asked for about the software quickly from the seller. Getting my license activated also went smooth and really quick.

BL4CK98 - June 14, 2022, 12:08 pm

I have received a vouch copy from OP, here is my honest review.

The activation of the license went smooth and really quick, op was very responsive and friendly and he answered every question i had in a friendly manor and was really quick. I like the UI(1.0.0 - 1.3.0) it is as described but waiting on the new UI that the op will release. The crypter is really good i would recommend it to anyone, very user friendly and anyone can use it. As Heaven said the execution method is pretty unique.

jamsensei - June 15, 2022, 10:46 pm

Thank you for your comments Our Crypter is up to date

Ph4n70M Phr34K - June 17, 2022, 11:33 am

asdabi31 - July 29, 2022, 5:51 am

Hello jamsensei

It's new week I would want to try out your crypter on my snake file but I would love to see just how well it works with it before paying for a private stub.

I ask you crypt one file and I test to see how compatible it is b4 making purchase

BL4CK98 - August 1, 2022, 1:21 pm

Bought 1 Month of Private Stub and i must say, i am amazed. The quality of the crypter is amazing and would highly recommend buying.

The customer service is also really good, OP was friendly and fast on the delivery of the license.

Customer service 10/10

Product had a nice well done UI and it was very easy to understand.

UI 10/10

The crypter has many features and bypasses all AVs as of today(01/08/2022)

Features 10/10

Tested the crypter with DCRat and Quasar.

casperr - August 3, 2022, 7:05 am

Bought his private stub , the crypter fully working and undetected (its really bypass windows defender) very simple and easy to use , the owner is very kind and helpfull i recommend that crypter .

Golden Boy - August 5, 2022, 4:02 am

Where is your telegram group gone & why are you not responding to my messages? I already paid you \$1800 & now facing this?

jamsensei - August 6, 2022, 10:49 am

Greetings to all of you Seven Eye Users, we are over our 2nd month together, we are now at version 7.2.0.0 and we will continue our progress together without slowing down.

Of course supported.

.NET & Native supported.

Golden Boy - August 16, 2022, 9:20 pm

Guys, please beware this guy "jamsensei" is a scammer and ripper. He ripped me off for \$1800 into buying silent doc and pdf exploits.

Everything was smooth.

2 days after receiving the money he blocked me from telegram and removed me from his groups.

My only mistake was that I didn't create a contract on HF before the deal.

About this crypter, it's not a private stub at all. It's a public stub shared with hundreds of other users which he claims to be private.

Do not trust this at any cost. He will rip you off your money and then block you. I trusted him because he was always nice to talk to and helped with issues related to the crypter but I have learn the hard way.

Please do not do any deals with him. Now he won't reply to messages.

I just want to tell him "Burn in hell".

(Jun 11, 2022 01:19 AM)Milk Wrote: [\[CITE\]](#) Above pictures show what's happening, he send me some shitty detected out the ass public malware binded to his crypter that's simply a C# gui with a shitty stub(better than his other accounts since this time he actually got the crypter to do something) As said in last message if anyone wants the file to examine themself convo or pm me, he has packed it with some shitty public crypter (40 detections scantime) so I couldn't tell what exact malware it was at first glance but was dropping two other files and creating its own process on startup when ran aswell as a bunch of other obvious shit. Something to point out ,
You did not show exclusions and on your main pc your mic is being used you might be just speaking with a friend who has access to your vm through a rat which is excluded in windows defender and hes starting your excluded rat.
And your disputes does not help on the situation too!

You are crazy with jealousy, a small trade has taken place between us and you tried to use me narcissistically, even if you are a customer, you should pay more attention to your behavior.

You're an idiot scammer and I'm just glad nobody is buying this garbage. Wish this forum had more supervision to get rid of fools like you

Sticky Bot - September 13, 2022, 2:12 am

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on 09-20-2022. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).

This is the best crypter I have used since last year, the customer service is top notch. It is 100% FUD and the runtime is the best.

its probably the OP he knows this crypter isnt working

Sicario P - September 29, 2022, 12:39 pm

this guy makes me laugh a lot, for 180 dollars he eliminated me from his crap group on telegram LOL, as this forum accepts these scammers, I attach in the following comment the video where I show that this is a rat.

<https://vimeo.com/755272407>

I think I will make a channel of only scammers, to publish every shit that only damages this forum.

(Jun 11, 2022 01:19 AM)Milk Wrote: [\[CITE\]](#) Above pictures show what's happening, he send me some shitty detected out the ass public malware binded to his crypter that's simply a C# gui with a shitty stub(better than his other accounts since this time he actually got the crypter to do something)
As said in last message if anyone wants the file to examine themselves convo or pm me, he has packed it with some shitty public crypter (40 detections scantime) so I couldn't tell what exact malware it was at first glance but was dropping two other files and creating its own process on startup when ran aswell as a bunch of other obvious shit. What was also hilarious is that the owner scanned his own file on virustotal yesterday right after he compiled. Something no competent crypter dev would do, nor anyone who has basic knowledge in malware. He has spammed me a bunch of shit just now and has said he needs a different file for a test crypt since the crypter itself that I gave him to crypt has already been crypted? I waited a bit after I sent a new file and he read it, sent a follow up "?????" Several minutes after and he has also read that and not responded for 20 more minutes. So safe to say he's a scammer spreading some public shitty malware that he can't even crypt himself and has no clue what he's doing!
GG

Several other users have dmd me off this message saying he's scammed them aswell and runs around on new accounts all the time scamming, this is my vouch copy review!

-This is my review based off my vouch copy contract which I can give proof of, though the user deleted the contract after I made my review so I couldn't rate him badly
So, this crypter is a scam or what?
