How can someone test this service?

NotKover - June 10, 2022, 10:28 am

So for this exploit is it only for office or do you do something to allow it to be ran when opened via browser?

You can send me your file and i am going to build .pdf exploit with your file.
After that am going to execute .pdf file while you are watching using anydesk or teamviewer and
you will see that your files was executed silently.

Because i dont give a fuck about beeing banned for sales trashing a scamming pleb, that comes just from 50 failed attempts in buyers bay with copy pasting your tg to everyones thread, and then try sell a silent pdf exploit.

if the rules protect you and let you rip off 0.03 btc from someone, so be it - but ill take a warn to

prevent it anyway.

You can prove it by providing a pdf to a trusted member of the community, that will silently execute a given file while remaining undetected. It wont be me. Not wasting my time on your story

already called it. You know its true, i know its true, lets get over it

/edit

I even got a red egg for the post. Even HF EggEngine agrees.

pdf exploits doesnt exist and do not trust any videos or live demos, its very easy to fake it.

OP is total idiot and blatant scammer, [mention=5037217] you may want to roast him

Milk - June 10, 2022, 3:14 pm

Blatant scam

lolllllllllll

Unfortunately this user is only banned for 7 days currently, but props [Perplex](#) for calling him out. He is trying to sell thousands to tens of thousands of dollars worth of material that just seems scam-worthy.

suduspoon02 - June 10, 2022, 6:49 pm

At least provide a vouches to trusted member so that we know the service are true.

Threatening - June 11, 2022, 4:41 am

Glad he's banned, i wanted to say my thoughts on this guy yesterday but i decided not to because i could of been in the wrong. Either way i wasn't and i'm happy these people are getting ganged up on lol.
