Thread: [Free UberEats \\$25 Method.](#)

MrT.Eats - June 11, 2022, 11:42 am

Simple and short! USA Only!

Use LVs method posted here <https://hackforums.net/showthread.php?tid=6175150>

But since Bluestacks is patched you'll want to use Opera or Brave with GEO Locations Disabled. There is another browser but I will hold off listing because these two work fine

Use Talkaphone Mobile App for the SMS Code.

Then use Revolut or any VCC provider.

Then use code "mrzanadoodeats" for \$25 off ANY AMOUNT

Then checkout!

Enjoy the free food!!! Hurry before it's patched!!

Also when this code is patched soon, just go to Reddit and search for Referral codes. They have \$15 off \$20 and \$20 off \$25 No restrictions and they'll never be fully patched :)

THIS IS NOT THE METHOD I DO FOR MY SERVICE! So burn this shit UP!!

Of course!! Not sure why people are selling Public methods, or why the Mods even allow it to happen.

If brave gives issues, Ghost browser is a nice Alternative.

rd3600 - June 11, 2022, 1:24 pm

Thanks for the method! I literally just used it and it worked perfectly w/ Brave and JuicySMS - 30\$ of food for 5.81 for my parents! feels great man. thanks for being a kind dude and doing this for free.

jcole - June 11, 2022, 1:30 pm

It took me a long time, and had to deposit 3 euros and spent a euro for a phone number, but I got the method working after a shit load of headache. I used Opera browser to do it.

To repeat you'd want to use the browser he recommended, you can likely also do so from different devices/IP although OP would know more than me on that.

I think next time I'll use a VPN in the Opera browser and try another SMS. I don't really like these methods because I suck at them, and they give me a headache.

Respectable, although I believe it's tracked via cookies/etc. I'm not sure if VPN will work ?

What do you do if it asks you to confirm you are a real person by logging into facebook? I used Brave with geo location off, Talkatone, and Revolut and it's still asking me for fb verification.

Just put Google Pay as a payment method then switch back to your card. That's what works for me anyways

Are you making a new profile in Brave for every order? Can't do multiple orders on same profile.

Yep completely new phone number, email, and revolut card. All on Brave with geo location off, tried it with 3 different sets of new everything. It's weird because it worked for me fine twice yesterday lol.

Luigi - June 13, 2022, 8:38 am

Same here. The order doesn't go through with the cards and it'll just bring me back to checkout. I even used my own card and it doesn't go through.

However, I do see the promo code

(Jun 14, 2022 07:12 PM)Kappa Wrote: [\[CITE\]](#) Switched to opera and PayWithMoon and still getting the same error :/

EDIT:

I finally figured out the problem, Revolut works fine. The problem is either 1 of 2 things, either your subtotal needs to be above \$25 or you need to put your email in first when registering. After I did both of those things I was able to place 3 orders using Revolut with no issues at all.

What browser did you use? And I guess Moon card is blocked. I also get the same error you get. Because, my subtotal always be over \$25

Internet Bully - June 15, 2022, 11:37 am

Not having any of the issues mentioned here

Luigi - June 15, 2022, 2:29 pm

I switch from brave to opera and I get you're not eligible to use this promotion error message. I switch from opera to brave I get the same message. Ughh.. I have geolocation off and tried using moon card and revolut card. nothing.

I got it to work using brave but using the email address first like you said. Worked 3 times already. Also learned that it doesn't work when I'm connected to my VPN.

MrT.Eats - June 19, 2022, 8:18 pm

Just use referral codes and make cart the min. None of these Uber Providers know Uber Cash exploit so they're all refunding the orders after this is 100%.

The Uber Method sellers are just telling their clients to refund the order after to get the order for free after the \$15 or \$20 off....

My service still can do \$35 orders and prove the over promo amount is being paid by Uber Cash.
