Fetch Rewards Loop for gift cards

1. Download the fetch rewards app. You'll get free 2k point
<https://fetchrewards.onelink.me/vvv3/referraltext?code=V33J16>
2. Create your account and link your email. Email that you connect MUST match to the email on your fetch account
3. Once you setup your account, go to the discover tab and scroll down to see special offers for you section.
4. Look for offers for items that aren't retailer locked.
5. Next either use target or Walmart to add all the items from those offers and make an order for them. Target pickup works and you don't get charged in general if you use a target redcard until your orders ship/get picked up
6. Once you made your order, click on to the camera button in the app and then select the eReceipt option. It will scan the email you connected for purchases. Amazon is an easy one to get easy points aswell
7. If done correctly, you should receive the points plus bonus points from the special offers section to your account. If the app didn't pick up your order, disconnect your email and reconnect it and then retry step 6.
1000 points = \$1
8. Once you get the points, go and cancel your order from the site your ordered from. Next, go and delete the cancelled email from your email.
9. Once you have enough points, you can go to their reward section and redeem for gift cards. They typically deliver within 24-48hrs.
10. Repeat steps 4-8 to loop points and cash out

(I'm not money hungry so that link isn't mine, lmk if you want me to use yours)

im new here so soz if I make mistakes with posts but yeah I have hella method and loops for free obviously I believe we're all family :)
