Thread: [\[SOURCE\] Online CryptoCasino \(include games and backend\) for sale.](#)

Moon_Developer - June 12, 2022, 11:03 am

online gambling casino, deposit only with crypto.

include various games, slots, dice, and live casino You can customize chances, max and min bets, deposits, all from the online interface, so you don't have to deal with direct php or backend code.

Requirements :

mysql
PHP 7+
Basic knowledge of html, php, mysql db (really basic)
Dedicated Server (preffered, instead of VPS.)

live casino requires an API to be setup, provided in the source code aswell

FAQ

You can easily modify theme of site.

You can start earning money , you just need an offshore dedicated server to host it

I'm selling this because I hosted in past already, but now I'm focused more on my other malware project, then on online gambling

NO demo or "vouches" copy of it.

I will give to you full source code and help on how to setup it, I can also setup it for you if you provide root credentials.

Withdraw and deposit is all made on site, supporting BTC / ETH / LTC only for now.

Price - > 600\$

This is a cool project but you've been on this forum for under 2 months. I can't imagine anyone is going to send you \$600.00 without even seeing a demo. Anyone interested should definitely use a MM, you are open to that OP?

Reporter - June 12, 2022, 2:27 pm

Did you create it?

Who created it?

Where did you get it?

Any proof that you created this and not just a nulled theme from codecanyon etc?

Trapstar S - June 12, 2022, 2:40 pm

Hit me up. I'm interested
