Thread: ["FREE SHELL HOSTING" My Dos Shell/Make Dos Shell](#)

MOD3M - August 18, 2010, 7:33 pm

Hello HF. I just made a quicky (Dos Shell). But I found a couple FREE Sites to host on and the Shell works! First of all heres my shell <http://xionsdos.p4o.net/> I uploaded to "p40" and it works, give it a try. Its not the best one ever you got it on that , But it works on small sites/forums,also if anyone wants a personalized Shell.Made and uploaded to this or different server. Let me know I will personalize colors logo links etc. Plus No Adds.

P.S. Dont send PM Please comment.

Over and Out HF

RedPill - August 19, 2010, 6:01 pm

Are you releasing the source of the said shell? Could you make a shell then give the source instead of uploading it?

I would be interested in getting the source of any style of the shell, if you can give it out. Thanks!

You if you got aim hit me up: id0ntusecrack i could really use your help man.

Xdem0 - August 21, 2010, 10:30 am

You sir are the prime reason this section of hf is flooded with meaningless threads that don't fit in this subfourm.

"Batch ,Shell, Dos and Command Line Interpreters"

Shell scripting is much like batch, except it has a use other than popping up a meat-spin 5000 times.

ie:

zsh, ksh, bash, dash

While they are all login shells, they have different syntaxs for scripting, and are also command line interpreters.

The "shell" in the subforum title isn't "sUpEr LeeT d0ds sh4lls"

Now i can't wait for the day that somebody post's a few bash scripts and gets some intelligent replies, without it being spammed out by threads on batch codes and super haker d0ds.
