Thread: [Cyber Security Learning Material \(CEH, Metasploit, Ruby, Python & PenTest+\)](#)

Nebula20 - June 14, 2022, 6:08 am

I have some learning material I gained from a bootcamp I took for penetration testing (CEH & PenTest+) and looking to sell for cheap for others to use. There has been new versions of these tests since I took the course but the information is likely still on the tests.

The bundle of PDF's include -Metasploit Penetration Testing Cookbook

Python Notes for Professionals

Ruby on Rails Notes for Professionals

Ruby Notes for Professionals

CompTIA PenTest+ Braindump (Previous version)

Certified Ethical Hacker v10 Braindump (Previous version)

CompTIA PenTest+ Study Notes From Bootcamp Company (Previous version)

Certified Ethical Hacker v10 Study Notes (Previous version)

I don't know how much I want for them so just throw out a number, like I said I'm willing to sell for cheap since these certs on new versioning. (Most information should still be relevant)
