Thread: [ULTIMATE MANUAL TRADING - Learn a 70% - 80% Winrate method with sniper entires!](#)

CasualInvesting - June 14, 2022, 9:29 am

[size=xx-large]First 50 Sales at \$99 to get reviews and feedback, Then price will increase to \$199
PM Me for more info

Bonus: I will be creating a robot for this method in the future. If you purchase now, you will get FREE Access to it once it is released! ETA: 2 - 3 Months. Once the robot is out it will cost \$200/Month. Do not purchase it just to rush me to release the bot please.

If you're an experienced trader, you've might know where the above screenshot comes from, though I can bet you never used it. The app is confusing, and my eBook shows the best configurations for HQ signals.

HOWEVER,

1. You will not get a high Winrate like this by following the app blindly
2. It is not as simple as just recommending the app.

While the signals from the service are HQ, they need extra confirmation for them to be sniper entries.

This eBook shows exactly how to get the app for free and setup your signal confirmation to get sniper entry targets on the 5 Min or 1 Min Chart. It works for both MT4 and TradingView!

This method works great for prop challenges as the RR is VERY HIGH! Usually 3:1 and can get as high as 10:1.

2 Vouch Copies to Highly Respected Members who are traders. If you can't trade then don't ask for a vouch.

Interested in this as I'm a trader (experience with equities, futures and crypto) and have come across pretty much every trading strategy and indicator.

I'll be happy to take a vouch and leave a detailed review, from an actual trader and not a vouch copy beggar.

I've received a vouch copy of this method and I'll begin my review.

The method format : Delivered in a PDF format, easy to read, has corresponding sections and outlines what you need immediately rather than beating around the bush - something that's not that common considering the state of HF methods.

The actual method : I'm familiar with the method that OP provides however I haven't executed it the way that the method shows, but this isn't some magic immediate profit indicator and it certainly will not make you rich overnight. I can confirm you can use this method on any Windows or Mac platform and you can try it out for essentially free (besides the cost of the method). Can you make money following these steps? Yes, if you put in the time to understand the nuances of trading and cherry pick the right times to enter and exit.

However, 90% of traders don't make it and this method isn't the saving grace. It's useful if you know how to apply it properly, if you don't then it's just some noise to an already noisy field.

Thanks for the review!

Users who purchase will also be getting lifetime updates. I'm already working on other methods to confirm the signals. I've added a new indicator to the ones provided which will help with getting some very high RR entries. I released the indicator late yesterday, so lifetime members in the discord channel have access to it already.

In terms of difficulty, while it will always be better to have trading experience as you'll be able to read the charts better, because the methods I use are based on the fundamentals of trading (support, resistance, trendlines etc.) It is very easy to follow along while watching other youtube videos to understand more about trading. If you are seriously trying to improve at trading then using this method for the signals and my recommendations or your own indicators to confirm, then you will definitely make a lot of money.

I already have more manual strategies that work well in mind, as well as a custom trading view indicator that i'm just making a few small changes to before releasing. Though it might be a subscription paid service!

More indicators will be released soon.

I already have you on discord so i'm gonna send you a message.

I've just released 2 new strategies which are way more simpler and easier for beginners.

Key points:

1. 3:1 RR on average
2. 50% Win ratio
3. Can scalp even the 1 min chart (that's what i've tested it on) and works very well on higher TFs of course
4. Can be used with trading view free

can be used on any chart too, including crypto and forex.

Example from today on AUDUSD.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

I mean, If this really works, I would buy Instantly, but there are no reviews, and no sells. Sorry bro, as much I wanna cooperate with you, you seem too risky
