Hello,

I've been EW for the past few years and I stopped for a while I'm not willing to go back so I decided to sell my 1y old Bots copyrights which means you can resell it or whatever ...

I might change my mind to selling weekly license keys if there are enough interested people -
I can add a lot of features if smn is Willing to pay for it

Anyways here's a lil demo How both bots Works ...

Bots demonstration vids in attachments to avoid time wasters
[attachment=732]

I have no price on my mind so feel free to dm to negotiate ?

Question: since you made the bots, how many times needed an update?

In case of purchase ,if they stop working, what could be done?
