Thread: [250k Revenue WoW Boosting Site](#)

roughly about 250k USD in sales / year.

after paying boosters i get about 70-80% of revenue as i work on it also.

<https://arenafans.net/>

Would be looking to sell all upto 49%. as i would still work on managing and working for the website fulltime.

All advertising was ingame and word of mouth so i would need help with google ads, youtube and other forums

An IRL contract would be set up to secure us both in the deal.

Also would be willing to expand into other games if a buyer has the knowledge and a list of boosters

for proof of revenue i could send it via PM or discord

What do you expect from the buyer aside from buying those shares out and help in marketing?

How much are you looking for?

marketing is honestly a big downfall for me at the moment so that would be main priority
and for a price i will contact via PM
