Thread: [White Hat or Black Hat?](#)

Upgrader - June 18, 2022, 2:19 am

Just unlocked the hat_picker in the hack game, which is better for leveling up or is there no difference?

Not sure if there is a difference, I picked the white hat

You should maybe wait for other reviews before ^^ I don't think there is a difference, but maybe there is a difference

I chose black hat, as me anything.
Think there is no different.

Maybe the missions are different?

I think the only difference is possibly the names of missions and stuff, unsure if there is a leveling speed difference but I doubt it.
