Thread: [Otg shell without ADB](#)

Janusmonet - June 19, 2022, 7:56 am

Is there a shell command to access the system files of a otg connected tablet? my phone is otg cable connected to a tablet, and I'm wondering whether there exist a shell command to access file system of targeted device. So far I've been stuck using Nexus' OTG USB File Manager to do this but it only allows me to view sdcard contents, but I need system file access too.

Also I can't use adb because USB debugging isn't enabled on the device targeted. The sc

Any suggestions please? Anyways, if anyone can help me with this I would greatly appreciate it.

@JennasDad

Do u have the stuff to put movies in the videogram on the 3.31

Sincere Zoe - June 23, 2022, 10:47 pm

What's up family? I'm Zoe Sincere formerly known as Sincere Zoe. Went to the box for two months for a cellphone. I'm trying to get back in the chat rooms. Did Bob go home? I know he was saying he had 60 days left. What's up with Team Android? Is there a real break for 3.31 yet? Holla back. I'm Zoe Sincere on the gram.

Big hammer - June 24, 2022, 7:49 pm

How do I get verified I'm trying to earn how to break 3.31 tablets or at the very east earn how to downgrade from 3.30.3 without using adb and bootlooping my device

StevexSmith - July 6, 2022, 6:21 pm

Yo. Hit me up telegram @StevexxxSmith I can verify I'm not most or doc

Big hammer - July 9, 2022, 9:15 pm

Is there a way I can make the 0 drive bigger and leave only about 1 or 2 gigs in the external drive the reason I'm asking is they got this machine they plugging the tablets to at my camp but it only show what's in the external SD and they bookin you if it show anything that ain't from jpay

Is it possible to connect to the jp6 using a USB and terminal emulator and disable the media scanner on the target tablet without breaking the tablet

Jesusoflauderdale - August 18, 2022, 11:00 pm

I've got what you need. My software will turn your tablet into a host that will break any JP6 tablet. A target tablet's lack of USB is no factor, as it must be powered off as the host tablet molds it like the Almighty did with Eve from the rib of Adam. Text back if you're a serious invested and your money's right.

Further, I would also suggest using ES Pro, a file manager, to access the storage drive on the SD card. Some phones will allow you access to a target device's external and internal drives (SDcards).

Willis Lucas - August 25, 2022, 11:08 pm

i need a lot shells everyday.please add me tg@haiahaia99

Catfish1 - September 5, 2022, 7:56 am

Dose anyone know how to use the jp6 tablet to connect to and break the jp5 mini

Catfish1 - September 7, 2022, 8:17 am

I'm trying to pm lord annomous but it will not let me pm anyone please hit me up my telegram # is 850-272-5293 thanks

webshell buyer - April 24, 2023, 11:33 pm

#wtb fresh shell

Need different IP

Can upload and edit

No need subdomain

My process:send domain list > chose > send shell >

check shell > work > pay PM

If you have, please dm
