(Jun 25, 2022 05:09 PM)MAK1 Wrote: [\[CITE\]](#) If its detections from AV what is the time to crypto ? what do you mean?

currently, it is completely FUD on scantime using pureminer, just 1 detection from Sophos on runtime.

stealers/rats/botnets are completely FUD on runtime and scantime.

Want to leave here my bad experience with the seller

Before make a contract for the crypting service I hade done another contract with this seller that worked fine, even with some issues, the bots bought were delivered. Based on that experience and on the reputation of the seller I decided to give it a try on the crypting service. HUGE MISTAKE.

1 - first on the advertisement says the file is delivered in 1 hour. On the contact made he asked me

7h and no problem with that but the first file (of several not working files was only delivered 1 week later with some excuses on the middle.

2 - the files are so or less fud as the ones anyone here can do by yourself. Some were detected by the browser, others were detected scantime and others runtime, the one not detect simply didnt work, with no client, no persistence, nothing.

3 - I have bought the private stub for 99usd and after serveral failed attempts where supposedly was used the private stub, said it was going to use a semi-public stub that besides be shared is 59usd, no need to say that it didn't work too.

4 - at some point he asked me to take some screenshots of pureminer tabs and saked me to remove the "add exlusion" and "persistence" option, to later say that the pureminer can't be crypted (the seller advertises it can on the first page) and that on his end the files bypass AV but not WD (that is only the main AV, and I think the seller should try to find what FUD means, FUD is not semi-FUD or UD is FULL UNDETECTABLE).

5 - I get tired of so many attempts, I have been on this for a few weeks, and asked for a refund, and the seller accepted. The refund was delaying and through telegram I insisted and he was continously postponing, or haven't btc, or was on holidays, or was because of the car, and the only refund made was of 20usd. I continued to insist when the refund would be made and he just deleted telegram chat.

6 - I don't understand how others got success with the seller, maybe I got some shitty stubs, I don't know. I know that the seller dind't kept the word regarding the refund and I have paid for something that I have not received, despite seller insists it worked point to online AV checker but I have screenshots proofing this is truth.

7 - I also don't know how to describe tha,t in one of the lastest conversation, the seller told to me that if I assumed it worked, the seller would proceed to the refund, basicaly was asking me to lie (unfortunately this I haven't screeshoted).

I don't trust this seller anymore, failed to deliver the contracted and faild to honor its word.

So for those considering to crypt pureminer, look another place as the seller assumes it can't be crypted neither WD can be bypassed.

The images that proof what I said here.

first of all, the bots I sent to you were just tested to test if your file is working.

second, you never told me it was detected and you just opened a dispute here without messaging me first.

this is why i don't deal with newbies.

This guy Took my Money
Sent him a file for crypting

he send me a crypted file
at first place it didnt work

and also even could not bypass the windows 7 smart screen

Now he is not replying me on TG

All chat log is available

i demanded the refund and no response

dont deal with this guy all fake review and bumps , HF admins shld take action as well

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

doom3 - May 1, 2023, 11:33 am

There is a bit of complaint here and there that he's been ignoring. Does someone have tested his crypting service and can vouch for him? Because there are vouches, but it was too old.

aetherhf - May 1, 2023, 2:48 pm

I just ordered a private crypt for my redline, this is my first time dealing with DeepWeb!

He delivered the crypt in just 2 hours, with runtime scan check FUD and added my own settings that I wanted which was not easy to make but he made it work.

He also gifted me 100 bots for free which was generous of him ^-^

Will be back for sure!

ovbeirs - May 1, 2023, 3:14 pm

What a seller, am very new to this side. Explained exactly everything to me, asked him some things, which I had zero understanding of, and was able to answer me this. Very friendly, and definitely keeps his appointments! 5 stars!

i get so many sales daily, but from different forums, i started making this thread alive on hackforums just this week.

the people who did the bad reviews never dealt with me or could be they spoke to an imposter as i only deal through hackforums contracts.

just open a contract :) and i can go first, if you like my work you can pay!

If OP scammed you its best to show proof because just calling him a scammer does nothing and convinces no one especially since he has a 150~ positive b rating

can you encrypt all kinds of RAT's even old ones like njRAT or darkcomet?

if not can you make an exact list of the RAT's that you can encrypt??

your crypter can be used on windows 7, 8 and 10, 11?

linux and macintosh??

on the other hand, how to do business safely when you see the article below?
