For the profits shown what is the lot size?

Strictly forex (no cryptos/gold/silver etc)?

Strictly Forex, so lotsize always depends how big your capital is, but when I deposited around 1.5k USD, I started with 1.96, then 2.04, then 2.13, and so on.

Compounding them every day, 97% success rate, 6-10 pips every day.

Btw, broker takes big chunk from commissions, so net profit is around 3k USD.

Doesn't really matter since the signal wins and profits everyday anyways.

oh, and I withdrawn 1.3k USD in between, so I "could" have earned more.

Still fixing group chats, but ready to take someone anytime.

Have to be open-minded and coachable.

Are the entirety of your the wins and losses for the whole month? That's a high rate. Just wondering if you left some losing trades out of this profit log?

Hey, yes that's for whole month. You could see the loss on June 15th 15:40:20, though if signal is losing, there will be always a second signal to recover that loss and potentially profit as well too.

Signals are like 97% Win Rate right now.

All trades are closed, each only last 30 minutes.
