Hit me up I will do x3 of your stub and it will bypass runtime, how long? It can last 5min or 5days depends on how heavy you spread them.

Price: \$20

Don't sleep on this.

For further discussion hit me up on telegram, discord as well on here.

Work with X64 (Pureminer)?

Injection itself?

Can you handle LHR mode?

UAC bypass fully silently/stealth?

I see that you are very invested on the forum and that you carry out a lot of tests on the crypts offered at the moment. Is there a correct one right now? It feels like a big chunk of the market right now is bad. Thanks for any informations <3
