Thread: [Keyz-p -- keylogger C++ FUD 15\\$.](#)

Switzerland666 - June 26, 2022, 8:11 am

Hi.

Keyz-p

Im selling FUD C++ keylogger.
15\$ build exe or 50\$ source code.

Functions:

- It uploads to the ftp server every 15 min(i can set more or less)
- It gets the current window name
- It makes screenshot everytime window is changed.

Here is file packed with UPX public packer.

Packed with UPX is file size 24,5 KB.

Accepting bitcoin or ETH.?

I can easily add more things in as you wish.

If someone want to write a review i can send him a demo exe.

GLWS but dont use jotti, once your file is handed out by them it will no longer be FUD

Switzerland666 - June 26, 2022, 9:35 am

Its packed with UPX so no damage done.

Can you state clearly the functions and features of this tool

Like

What are the windows this is compatible with?

How many password recovery can this do,like Edge,Foxmail, qq, Yandex, Googlechrome etc

Give more light to this product

Are you saying this can work in windows 7, 8.1 and 10?

I suggest you add email or discord webhook options for logs because most times ftp is disappointing.

Switzerland666 - June 30, 2022, 8:20 am

i can add it if you decide to buy
