Thread: [Auto Game Gold - OSRS Gold Mining App | Windows/Linux | Free Use | Payout Ingame](#)

#Skyline - June 26, 2022, 8:16 am

About

Currently powered by the RavenCoin Blockchain, Auto Game Gold enables gamers across the globe to mine virtual game currencies using their devices graphics card (GPU).

Auto Game Gold is the next generation of Web 3.0 applications providing value to it's user base. With no registration or on-going fees, we simply allow our users to generate in-game value using their device GPU. Discover the new age of Web 3.0 platforms, as we dive into the future of blockchain and it's endless innovation !

An interesting idea but how is gold received once mined? Traded ingame I assume but the process isn't clear on this part.

I'll try it when I get home if you clarify this?

Yes, OSRS is paid out in-game directly to your OSRS account. We will meet up with you in any world and trade the gold directly to you from our mules. Payout process is very similar to buying OSRS gold, but instead you're mining it.

Once you have mined the minimum amount (500k OSRS), you can then request a payout via your wallet, which you can find once you've created an account and signed into our website. We will be sent a notification on our side that a user has requested a payout. We will see you online via our live-chat when you've requested a payout, or if you're in our discord. (Cannot link discord on HF sorry).

If we are offline on our livechat, we will always get back to you ASAP.

Sounds like a very cool concept, may give it a shot if I get back into OSRS still debating it. Good

luck with this project bud!

Sure, let me know if you have any questions or need support with getting started. Application is very simple to deploy, just download, install, and sign in with your Auto Game Gold account. You can also use multiple devices using the same Auto Game Gold account for mining.

Sounds very good.

When I have a very good computer again and I decide to get back to Runescape, I will use it without worry.

No ban risk so? You contact us just to transfer the ingame golds to us when we have mined enough and asked it?

Once you've mined over 500K OSRS or more, you can then request a payout from your mining wallet on Auto Game Gold website.

Once payout has been submit, we will trade the OSRS gold directly to your OSRS account in-game. We will never ask for your account information ever.

That's very good. I really want used this when I restart to play ORS. I suppose depend of the graphic card, but how long time approx for mined 500k ?

Cool concept!

What is the power being used for on your end tho? Is the power the costumer supplies being used to mine crypto? I assume something is gonna make payouts in OSRS GP possible.

Hey, thank you. The power is being used with the Ethereum blockchain on our end. We convert your mining power to OSRS gold on our website.

Your AGG wallet is then rewarded with OSRS gold.

We will be transiting from the Ethereum blockchain when the PoS merge happens.

When you request a payout from our website, we handle it via our websites live-chat or Discord like regular gold sellers.

We will then meet you in-game and trade you the gold directly to your OSRS account. We will never ask for your account credentials ever.

We plan to add more games also, like WoW, Final Fantasy.
So feel free to suggest a game.

You should try pay to play games like Habbo etc where you don't have a way to obtain free in-game currency. Could incentivize a lot of people to run on AGG to make coins.

Ok I saw.

Already, I thank you for your regular and fast answers. You have definitely won a user. Just that I'm not in a Runescape era right now and I don't have a big graphics card to do it either (I only have a GTX 1650 right now) but it won't be long.

On the other hand, if you also turn to other games like FFXIV, there I will be even more interested and I will also have several people interested.

Ooo good approach at getting people to legally download your botnet.

We still have a fair bit of work to do however, especially with this ETH merge coming, but that won't stop us or our users making use of PoW protocols with blockchains when it comes to gaming.

Swip3r - August 25, 2022, 4:19 pm

Definitely let me know if there is an affiliate program launched, know plenty of gamers that would use this for RSGP or WoW specifically, adding different games would definitely be the move.

Yes we currently have an affiliate system in progress being implemented. I will let you know ASAP once it has been added.

Currently this is what we are working on implementing to AGG.

- Affiliates/Referrals system
- 2FA / OTP (Email security codes have been previously added)
- OAuth binding (Link 3rd party/social accounts to your account)
- Support/Tickets
- Automated livechat payouts
- Swapping from ETH blockchain to another blockchain (This will allow 4GB GPU cards to mine with us, as we are moving away from the ETH blockchain due to PoS merge)

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Neat idea

w/ my 2070 Super it says about \$2m a day haven't played OSRS in forever so not sure what it's worth.

Does mining take more power than already leaving my computer on?

That would be roughly around .90 cents a day.

How has the merge effected business? Hopefully not too much. I really like this idea.

The correction would be 1060 3GB and 1060 6GB. 5GB was only available in some areas of Asia. Mostly gaming cafes.

Yeah unfortunately mining profitability has taken a big hit due to all the miners rushing from Ethereum into other low cost coins, we knew it would be chaotic however we expect it will settle down as the hash power sells off or resettles.
