I haven't had any issues buying it through Kraken, so that's generally my go-to. I've had decent experience with LocalMonero too. Everything was great about it except the rates available.

I usually go through Kraken, it's the most convenient.

Kucoin couldn't be more easier.

xPlutus - June 27, 2022, 5:08 am

I use tradeogre since it doesn't require any form of kyc.

Kucoin is one way to get yourself some XMR

xVulnerable - June 28, 2022, 10:40 am

Why is no one mentioning Binance?

Know your customer, big exchanges require you to submit ID documents so that they avoid as many legal issues as possible.

Tradeogre is a great platform if you wanna go with no-kyc.
