Thread: [Rat Getting Fucked By Anti Virus](#)

zimi - June 28, 2022, 12:48 am

dude ive tried so many rats n they all get raped by windwos anti virus after a restart theyre are gone from registry startup and they quarantine it before you even restart is there anyway i can get around this or any free rat or not to pricy ones cuz im not paying that much for a rat lemme know

TheTaka - June 28, 2022, 1:05 am

You just need a private crypter.

Ph4n70M Phr34K - June 28, 2022, 1:15 am

You can use async rat(its free) and get manual crypt from RAZ, he is selling single crypts for 25\$

Royal ! - June 28, 2022, 6:31 am

Damn, what's with the wording.

xVulnerable - June 28, 2022, 9:44 am

Private crypter. No way around it.

Milk - June 28, 2022, 11:13 am

His crypts usually won't get past runtime so not much of a point. Last I tried async with him a few months ago it was detected runtime the hour he delivered it, and he dosent guarantee runtime ur of course

Ph4n70M Phr34K - June 28, 2022, 11:17 am

he got my loader fud at runtime with windows defender few weeks ago

(Jun 28, 2022 01:05 AM)TheTaka Wrote: [\[CITE\]](#) You just need a private crypter.

Really? this is laughable cos most "private crypter" is worst than public ones, the simple thing there is that, most guys here claim they code the crypter, they are only marketers not coders, I think if there are real crypter coders here, they should be able to bypass the WD headaches; unless the "private crypter" stuff they newly implemented is only a marketing strategy.

benio2 - June 28, 2022, 10:35 pm

A crypt usually lasts a few hours because defender sends samples to labs. That's why you will most likely waste your money in most services.

zimi - June 29, 2022, 5:17 am

im not a coder i dont pay attention to grammar and weird nerd stuff my whole life is not around my computer this is something i do for bread

VelotionX - July 2, 2022, 8:11 pm

I wonder if it's possible to somehow make an exception in Windows Defender for that specific file, after we used the crypter?

After that it should always be on the system since Windows Defender "allowed" it.

Gallardo - July 4, 2022, 5:12 am

Private crypter is your solution buddy.

Sanel - July 5, 2022, 4:49 am

so im looking for crypter like fud ai have one but i cant make fud like for njrat and more only fud what i can make is put host and port and in msfvconsole do exploit ,, can you guys send me link for crypter and ahelp with njrat + ngrok ?

That's pretty much expected from free rats

sadwwaq - August 7, 2023, 4:03 am

Requires Anti Anti-Virus

EMMEKTHEBEST - August 8, 2023, 2:34 pm

you need also a crypter to make fud

xVulnerable - August 11, 2023, 8:59 am

(Jul 5, 2022 04:31 PM)Dyne Wrote: [\[CITE\]](#) He guarantees against the big 5 to my knowledge. WD, ESET, Kaspersky, AVG and Avast.

If you pay him properly, I'm sure he would would make an exception and guarantee business class like Com and Webroot.

He uses a simple but effective delivery method.I do not recommend using R A Z's service. He literally ran away with my \$25 for one private crypt a while ago because I hadn't made a contract.

(Jul 5, 2022 09:03 PM)Theblazinghood Wrote: [\[CITE\]](#) That's pretty much expected from free rats the crypt can stop the AV from detecting it when it gets on the system but the rat will leave traces over time that the AV will be updated to detect at some point the more public the product the more likely it will be reported

so i would look at a premium rat or a newer free rat and a trust worthy crypt
