Need a cheat for tournaments but I am not aware of any good private ones or alt least ones that are safe to use.

when it comes to something highly focused on like tourneys, i highly doubt any cheat is safe

You're going to pay up-wards of \$100-\$300 for a slotted cheat, that will be useful in tourneys. Every other cheat is going to get you banned in a tourney. It has to be ultra private to run in Tourneys.
