STEAM GAMESHOP & REGION CHANGE SERVICE [ARG]

With our service we will change the country of your steam account to Argentina so you can buy your favourite games at the cheapest prices in market, compared to other regions such as EU or USA.

We also sell Steam Games & Steam Balance (under the same process) for a 30% fee of the original price (Argentinian Price) if you want to make your life easier and don't risk in buying gift cards or things like that. For example, for "DRAGON BALL FighterZ" which is 60 dollars in USA and 26.75 dollars in Argentina you have to send us 32 dollars.

I also offer game selling by adding you as friend (you need to have your region changed first) for the same price (30% of original price) but you have to wait 72hs since you add me on Steam

You can check the prices of the games on <https://www.steamdb.info/>

Price for Region C.S.: 10 USD

PAYMENTS Methods : Crypto (BTC, ETH, LTC, USDT)

FAQ:

Quote:Q: What do you need to do the service?

A: We need your username and password BUT you SHOULD have your Steam Guard ON, to ensure the security of your account. We cannot transfer your inventory or scam you, you are safe with us.

We won't start the process if you don't have your Steam Guard ON no matter if you have paid or not.

Q: Is there any risk of ban?

A: No, it is a safe method and your account won't take any risk, no matter if the method gets patched or not.

Q: How long does this process take?

A: The change of region only take a few minutes once the process begin. In case you buy Balance or Steam Games it will take some more time.

Q: How can I top up money on my steam account or buy games with this method?

A: You can only top up your account with argentinian steam wallet codes (gift cards). You can buy

your gift cards on many sites. BUT if you want to make your life easier, we also sell Steam Wallet Balance and games.

Q: Can I do partial payments?

A: The answer is simple, no. Keep in mind about the transaction fees of the currency you send us in order to send the exact amount you need.

Q: Can I gift games to my friends that are in other regions?

A: No. Steam policy of use doesn't allow you to gift games if your friends' region are set on other countries, they need to be on Argentina too.

Q: Do I need VPN to enter steam?

A: You don't need any VPN. This method only change the region of steam store, not your game servers. You are going to still playing on your country.

Of course not, he's offering to update the region of existing accounts which is a harder task.

GLWS op, nice service.

Wait, Assuming I went on and changed my region to argentina, how's the balance thing works?

I'm right now in ukraine on my steam and the games are cheaper but balance and market prices are the same.

If you have balance the balance is converted from that currency to ars

That's i know, but let's say a key is around 2.5 in USA
in ukraine for example its the same price but in Hyrvnia
so my question is, how can you manage to get the same balance for cheaper?

The thing here is that in Argentina prices are cheaper so the game which is \$2.5 (for example) in USA might be like 0.5 or something like that

This will depend on the game obviously

Yeah I'm not talking about games, you said balance is cheaper as well so does it apply to market items?

Market items have a worldwide price
It is only for games
