Thread: [I need help getting Votifier public rsa keys from Minecraft voting sites](#)

hddzu - July 4, 2022, 2:29 pm

Votifier generates a static public rsa key for Minecraft Spigot(etc...) servers using Votifier, server managers need to store that same public key on voting sites like [minecraft-server-list.com](#), [minecraftservers.org/vote/550770](#), [minecraft-mp.com](#), [minecraftservers.biz/servers/149801](#), [topminecraftservers.org/server/27114](#), [minecraft-buzz/server/3096](#), [servers-minecraft.net](#), [topg.org/wow-private-servers/server-351883](#), [minecraft-servers-list.org/details/newwind](#), the rsa key enables players to get rewards from voting on those listings. I need help figuring out how to view the public Votifier keys those sites are storing, I haven't had much luck inspecting the sites with Chrome DevTools, I've only been able to find snippets that seem to initiate a handshake or something. I think modding the [spigotmc.org/resources/nuvotifier.13449](#) or making some program that handshakes voting sites into giving over specific public rsa keys might work. Using the key on webtools like [mctools.org/votifier-tester](#) will result in chaos.
