What do you do for them that they give you a share of their profits? You can just say in a general way not give up trade secrets.

You clearly have no idea how this business works but let me explain you

Average Onlyfans Girls make 180\$ per month

Doing the videos and pictures doesn't means anything

Onlyfans is not like webcamming that traffic comes from the website

You should bring the traffic so

Me and my team bring the traffic to her - manage her dm's to make money

And more other things

I don't get what a woman could possibly get from someone to make it worth her while to give this much of her earnings on her Only Fans to some random man? It's not like she needs some body guards.

Oh I see. Yeah I kind of briefly knew this webcam girl and I think a lot of their traffic comes from the men knowing the website and she just says what she does on Twitter which was something really weird and bizarre.

Everytime I see you comment you're legit just trying to gaslight someone into a fight. Maybe get off Hackforums and do something productive. He already explained why he takes such a large portion of the money.

Why are you quoting something I said in July 2022, when the OP has since made the time to explain it to me instead of getting mad, so now I have more understanding of how these businesses works and I no longer think what I said in that post?

Also my comments may show a different perspective on this stuff because I'm a woman. I'm not closed minded though, and I'm willing to learn new things and change my mind.

Yeah bro, in the past at least people were getting something for their sex. They are now getting pics and videos instead of something real...

Mr. Corleone - September 19, 2024, 10:38 am

Yeah the guy selling the blueprint is boasting his figures.

You make 6k a day but risk having your method not working for only 2k.

If you bought his story or his course you're both idiots.

WingRust - September 21, 2024, 1:42 pm

An associate of mine asked me to build a fan site, said he had a well fit model, I guess we all have different tastes, I said I would do it as I was gonna get a percent of the profits, all I had to do was make a paywall for the videos and pics, web cam would come later. He then started sending me the pictures, Jesus Christ I had to call him in the end and tell him, dude stop sending me pics now, especially around tea time, I was trying to eat my dinner, I never seen anything like it, I'm sure you've all heard the saying you need to roll that in flour to find the wet bits, and the hair woah. I

nearly threw up in my mouth. So that was the end of that. He wasn't very amused with me, turned out it was his girlfriend. Criminal (that's his nickname) if your reading this, I hope you've had your eyes tested mate, no one's gonna pay for that and I'm certainly not gonna sit there looking at it while I develop the site, no matter how much you pay me, at the end of the day 5% of nothing is bugger all. I have since found out I don't have any empathy although anyone that's got any taste would have run a mile, especially when they saw the close up shots with legs up, holding it open, even writing this is giving me PTSD, the state of that thing is permanently burned into my retinas, it had more facial hair than he did, which also seemed to run all down the inside of its legs. I'm not really sure what he was thinking, each to their own I guess. So that was my experience in the model industry. You can keep it.

He said "changes in the industry???!!!" and laughed at me. And I said "the internet". Then he chose to sell all his brothels in 2008 because things had become so crap from girls working for themselves. I did some security work for him and helped him catch a thief so I was his friend.

But the point of my story was actually that it a lot harder for the businessmen pimps and madame pimps selling what is real than it once was because of the internet pics and videos. They get fewer clients. Also strip clubs not doing so well.
