Thread: [Selling AWS & OVH Cloud Account with \\$11k credit](#)

LewisHHH - July 6, 2022, 10:51 am

Selling an account that has \$1k in AWS credits and \$10k in OVH Cloud credits. AWS credits have 2 year expiry and OVH have 1 year expiry. Credits cannot be transferred to another account.

\$800 USD

BTC, LTC or XMR is accepted

After payment, you will be given the account details for both cloud accounts.

Here are some of the VPS you can get with OVH Cloud:

<https://www.ovhcloud.com/en-gb/public-cloud/prices/>

I will provide 24 hour warranty on the account if it gets locked. Do not use these accounts to mine crypto, cracking, hacking, botnets etc. You will get banned from the platform. Follow the terms and conditions of AWS and OVH, your account won't get banned.

I'm happy to use a trusted middleman at your own expense if you desire.

DM me for more info.

Thanks for looking.

Do you have proof you aren't stealing socials and using their credit programs?

I can provide proof that all the accounts were created by myself.

How long the credits last is the question, if it's a year or less you used a \$100 method

This question is answered in the first line of OP.

OVH = 1 year

AWS = 2 years

Gotcha, can you explain to us why a \$50 method is worth \$800?

Who is selling method to get \$10k credits for OVH for \$50? Feel free to link the thread.

You said it was a \$100 method in your last post and now saying it's a \$50 method. Confused.

I'm not selling a method. It's accounts with the credit loaded. If you buy a method, you still have to do the work. These accounts have taken me weeks to create. If you buy a method, there's also no guarantee it will work.

These accounts have credit loaded and are ready to go. No work needed.

Account is still for sale.
