Thread: [NFC Cards](#)

MangoHacks - July 6, 2022, 6:47 pm

Is there anyway to use a nfc card to get stuff completely for free. Since it functions like a debit or credit card. Just wondering since I have one myself. Thanks for reading this thread.

yeah, only if you can change the values/information stored in that card.

for that first, you need a mobile phone with NFC or an NFC reader then download any NFC reader/writer application to change the information on your card...

But, Today's NFC card are too secured that they are managed by a third party cloud service to check the usage of card's like with nfc enabled credit or metro cards.

but give it a try..
