Did they leave you a popularity or b-rating? If so, what's your other user?

Just guessing? No. If you give us some information we might be able to help.

Do you remember any sort of name for him? Any description of the individual can help.

Did they offer any services? Do you know roughly when this would have taken place? Do you know what sections they were active in?

There's many ways you could track the user down, checking your old profile reps or b ratings, there is a page for the old rep system too. If you also remember what services they offer you could check via the search function.

Good luck
