Thread: [Passive income like no other!](#)

Shimmy3 - July 11, 2022, 6:41 am

Hey Guys,

After being basically scammed by AMG two weeks ago I have been on the hunt for the perfect passive income.

Luckily enough I've been lucky to find a person who has created a passive income bot that is incredible.

This is a crypto bot and the results are incredible. I have been using him for over a week and a half and ever single night the bot has closed in profit.

Currently i have 2k in the bot and is making \$40-50 dollars a day. Some days being lower and others higher. He has himself been using this bot for months and he has close to 8k trading every day with the bot has passive income of close to \$200 a day.

Lets be clear here. Im not selling the bot. Im selling all the info to get you in contact with him ie. his website/Instagram and discord to get in touch with him. Also to be clear this bot costs €200 a month and id recommend you having €600-800 starting off.

All im charging is €30 and a maxmium of 20 people. Once 20 people have received the info thats it im finished. All payment in crypto.

Also ill include AMG method in for free which is posted on Hackforums anyways ?

You are selling the info to a ponzi scheme, interesting!

You're the only clown for believing 2%+ daily.

You've watched multiple exchanges collapse because of 20% ANNUAL returns and you think this bot pulls 700%/year, right.

if he makes that much money there's no reason for him to be selling it

Gracioso - July 12, 2022, 5:26 am

could be something like eazybot.. which is basically a grid bot i believe. reasonably safe strategy. but either he's full of sh*t or he's selling info about something that is public.. OR OP prove us wrong.

If you're talking about jet-bot, i been liquidated for 60.000\$ by it. So... Hope it's not that one.
