PinkLSZ Developer Recruitment

PinkLSZ is recruiting new developers for the LSZ Developer team. This is a great opportunity to join skillful developers in doing projects together or just having like-minded people to connect with. Joining the developer team grants you automatic membership to PinkLSZ.

Our current team of developers are excited to add members to the team. We are looking for people who like to learn. If you're not as experienced but are willing to put in the time to learn and you enjoy learning new things in the programming world, we'd love to help on the journey. We have a group-funded bank that is available for the team if your project is approved.

Group Perks

- 10 Permanent gif post stars
- Ability to give and take up to 10 popularity
- Different username font
- Bold username

Dev Team Perks

- Automatic membership to PinkLSZ
- All group perks
- Access to the private PinkLSZ Github
- Project Funding (If approved)
- A team of developers to help with projects and to answer questions
- PinkLSZ VPS to host projects

Requirements

- Ability to work with a team
- Experience using git and Github
- Ability to code in at least one programming language
- Have the drive to want to create something
- No deal disputes

Please use this thread to apply using this format:

What language(s) do you have experience with?
What projects have you personally done if any?
Why do you want to join the PinkLSZ Developer Team?
Please list any portfolio/github links you'd like.

Please note that the main requirement after you join is contribution. This means that you, at the minimum, have to contribute to conversation.

skull - July 11, 2022, 10:00 am

I hope we get some more developers for the team.
I can only say we have some decent projects coming up.

Apply now while you can.

Lynx - July 11, 2022, 11:16 am

Hello!! i AM VE oops caps very interested in joining this team.

What language(s) do you have experience with?

c/c++, nodejs, python, php

What projects have you personally done if any?

I mostly do freelance development so thye aren't public.

here's a project I did for hf tho; <https://hackforums.net/showthread.php?tid=6085865>

Why do you want to join the PinkLSZ Developer Team?

I just want to be part of a team as elite as the Pinkszl dev team

Please list any portfolio/github links you'd like.

I don't really put my shit public but I bet my homies can vouch for my coding abilities cc [mention=2774521]

biscuit deluxe - July 12, 2022, 7:03 am

What language(s) do you have experience with?

C/C++, PHP, JS

What projects have you personally done if any?

I've built game cheats that amassed thousands of users along with the platforms handling licensing and authentication. Multiple client projects with great feedback. Recently I have been working on some big ideas but I haven't been able to work as much as I used to due to blockers in my life right now.

Why do you want to join the PinkLSZ Developer Team?

I want to learn and share knowledge with like-minded individuals. Nothing excites me more than chatting with those with the same passion and interests as me!

Please list any portfolio/github links you'd like.

I can share my portfolio and any links privately upon request.

B-Zone - July 13, 2022, 1:20 am

What language(s) do you have experience with?

(python , Dart , php)

experienced in wordpress , shopify

What projects have you personally done if any?

i am not working as coder i work as penetration tester in company so it was a must to learn coding

Why do you want to join the PinkLSZ Developer Team?

i want to get more knowledge and join to small/medium projects to get used on coding so i found it's very big opportunity for me to join this high quality dev group

Please list any portfolio/github links you'd like.

no github , i have done many wordpress websites but i can only share in private so if you interested to check it out let me know in conv please

Zero - July 13, 2022, 2:09 am

Please note that we can help with funding personal projects as well for those who need help. After review.

NotKover - July 13, 2022, 1:13 pm

(Jul 13, 2022 10:42 AM)shatter Wrote: [\[CITE\]](#) [NotKover](#) you might consider this.
Thank you very much Shatter.

What language(s) do you have experience with?

I primarily use rust and c++ but i have dabbled in a good handful of languages as well like go, c, php, js, delphi but dont use them enough to want to use them for big projects

What projects have you personally done if any?

I have made and sold about 7 different software made in rust but one that i sell publicly is <https://hackforums.net/showthread.php?tid=6208698>

Why do you want to join the PinkLSZ Developer Team?

I would like to join PinkLSZ dev team because it would be really nice to be able to have a group of people to consult with about issues or solutions i might run into.

Please list any portfolio/github links you'd like.

N/A

You won't be able to.

N - July 16, 2022, 8:48 pm

Pink LSZ Gang let's get it

Mercenary - July 17, 2022, 4:12 pm

What language(s) do you have experience with?: C# , JavaScript , (MySQL, MsSQL), Python, GoLang

What projects have you personally done if any?: One of my current projects is currently being sold on the HF marketplace. But, I have developed many projects, to include RAT's, Keyloggers, Downloaders and various other whitehat and greyhat projects.

Why do you want to join the PinkLSZ Developer Team?: I believe that having a group of Developers is essential, especially in larger projects. Having like-minded individuals to rubber-duck ideas off can be very helpful.

I am currently a full-time, full-stack Software Developer (.NET/Web - MERN) so I know how to work with a team.

Additionally, I am also fully self-taught and I have 10+ years of experience.

Please list any portfolio/github links you'd like: My GitHub is currently private, but I could share some projects upon request.

--

- Denotes my primary languages

Joel - July 17, 2022, 8:02 pm

What language(s) do you have experience with?

C#, Python3, Js/NodeJs, PHP

What projects have you personally done if any?

A ton of random things. Working on a basic landing page for one of my Shorts channels currently, although I f*cking hate front-end.

Why do you want to join the PinkLSZ Developer Team?

I want a nice userbar and I like the colour pink.

SSH - July 18, 2022, 1:09 pm

Super legit guy. Can vouch he's as real as it gets.

Great business man, with a great business model.

Very good at coding as well. Get this man Into PINK

Mac Miller - July 18, 2022, 3:55 pm

Will there be another general recruitment thread?

skull - July 19, 2022, 2:44 am

(Jul 18, 2022 03:55 PM)Mac Miller Wrote: [\[CITE\]](#) Will there be another general recruitment thread?

No, learn to code, then you may enter ?

Seriously, I don't know.

Satoru Gojo - July 19, 2022, 9:34 pm

What language(s) do you have experience with?

C (OpenMP/OpenMPI), CUDA, Java, Python, R, Matlab.

What projects have you personally done if any?

Separable Convolution for edge detection in CUDA, Rest API for machine learning applications of mining data, Mutual Information/Entropy calculation and plotting from CSV data for radio data, Random course projects using C/OpenMP/OpenMPI/Java.

Why do you want to join the PinkLSZ Developer Team?

I'll be a graduate student this year in a CS Masters program and being around like minded members who I can bounce ideas off of, work together on personal projects, and ask for tips in regards to projects or job hunting would be extremely helpful.

Please list any portfolio/github links you'd like.

I don't currently have any public repos as most of my work is academic or for clients, but could show some work if needed.

Mac Miller - July 20, 2022, 4:57 am

What language(s) do you have experience with?

I have a very basic understanding of python. I would like to develop my understanding of this language further, although there are many threads explaining the basics of this language, It would be nice to have some friendly guidance within a group :). I would be open to learning other languages as well.

What projects have you personally done if any?

Probably cringe to list this but the only project I actually ever made was a cookie clicker clone a few years back. I was pretty proud of it, made the graphics in tinker, it had used multiple cores in the CPU to run different code at the same time. Only things I think were cool about it, other than that it was pretty shit.

Why do you want to join the PinkLSZ Developer Team?

I do have a passion for development and coding. I want to learn more. I want to be fluent in at least one coding language, and help others with their projects. I want to be more active on this forum and this is a very active group. Although my knowledge of coding is lacking, I can provide composition to any game projects ya'll might have in the works. I mean, Having an OST in your games might be cool... I'm going back to school for systems security and would like to study up on these subjects more before I dive into classwork as well.

In conclusion, I know I'm not the best fit for the development team, but would like to join even if I just generally got recruited. I would definitely be a good fit for PinkLSZ. Lets sit around a metaphorical campfire and tell trip stories lovelies!

Lynx - July 21, 2022, 12:26 pm

Also this thread was posted weeks ago

Zero - July 29, 2022, 12:53 am

(Jul 28, 2022 03:11 PM)phantomman55 Wrote: [\[CITE\]](#) I can code in more than one language. c, c++, ASM etc.

Why is PinkLSZ wanting coders out of nowhere now?

We would like to build a nice community around different topics. Currently we focus on developers. Being part of a developers community can really help people with learning and seeking for help. In addition to that you may find other people with the same interests or goals as you that may lead to teaming up for future private or public projects.

As to your question, this isn't really out of no where. The developers team has been alive for quite some time now. We just thought it's time to give it more attention and help it evolve more.

WingsOfAltair - July 30, 2022, 10:59 am

What language(s) do you have experience with? Plenty including Desktop, Mobile, Web, Games dev, and reversing.

What projects have you personally done if any? NeatVibezPHP on GitHub.

<https://github.com/WingsOfAltair/NeatVibezPHP>

Why do you want to join the PinkLSZ Developer Team? Get in touch with like-minded folk.

Please list any portfolio/github links you'd like. I have, two answers earlier.

Hydrogen - August 2, 2022, 12:14 am

What language(s) do you have experience with? - HTML, CSS, JS, jQuery, PHP & PHP frameworks (WordPress, CodeIgniter), Python, Angular

What projects have you personally done if any? - I have developed a few News portals in WordPress, Discord Bot Panel in Angular, and a custom CRM in CodeIgniter.

Why do you want to join the PinkLSZ Developer Team? - To contribute and share my skills for self-betterment as well as for the growth of the community.

Please list any portfolio/github links you'd like. - <https://github.com/ml-tooling/best-of-ml-python> (Because currently I am researching and developing my skills on AI/ML)

SIM-3343347 - August 2, 2022, 1:12 am

What language(s) do you have experience with?TypeScript

JavaScript

MySQL

MongoDB

C#

Frameworks/Tools/Others:

TailwindCSS

Angular, Ionic, NgMaterial

NodeJS, MySQL workbench

Linux server setup

Goole Cloud

What projects have you personally done if any?

Most are owned by the company I work for, using Google Cloud integration, FireBase.

For private ones, there was one academic about crypto exchange, using bitcoin library.

Currently working on 3D chess & planets 3D conquer using threeJS & angular.

Why do you want to join the PinkLSZ Developer Team?

Share the knowleadge

Please list any portfolio/github links you'd like.

For private reasons can't post here but just this year I did 940 contributions, just a glance how active I am.

Vip?r - August 2, 2022, 5:31 pm

I can code css and html ?

AiDenti - August 2, 2022, 9:53 pm

Languages:

- Javascript

- some Python

- some C++

- some Java

- some php

Frameworks:

- React Native

- Node

Web:

- Javascript

- HTML

- CSS

- PHP

Currently working on a mobile app/website combo with React Native. Can't share much because of NDA and anonymity preference, but it's a lot of CRUD stuff mixed with point of sale. I mostly do the front end.

When I have free time I like to make Reddit bots that purposely break other Reddit bots.

PinkLSZ wants to be the longest lasting group on HF. I've been on HF since 2013 under different

accounts (never negative rep). You can be sure I'm here to keep the group alive.

Porn - August 5, 2022, 10:17 am

What language(s) do you have experience with?

C#, C, C++, Java, Python and HTML/CSS/JS(libs: React, jQuery)

What projects have you personally done if any?

Web apps: .NET Core and React, Spring Boot and React (both projects utilizing GitHub Secrets to store API keys and GitHub Actions for automatic CI/CD deployments to AWS using private containerized docker images)

Desktop apps: C# .NET WinForms, WPF, etc.

Mobile apps: Made an app in Swift over 2 years ago never touched mobile development again.

DeFi: contributed to small projects using solidity and rust, learned about smart contracts and non-fungible tokens (NFTs).

Why do you want to join the PinkLSZ Developer Team?

Currently completing software internship so I won't be active during the summer, but when I return to school I will be active within the group.

Please list any portfolio/github links you'd like.

portfolio/github is private

SIM-4932765 - August 5, 2022, 10:55 pm

Hey! I would like to leave here my apply.

What language(s) do you have experience with?

The languages I have a lot experience are C# and NodeJS, then I have good experience with Python, VisualBasic, PHP and Javascript.

What projects have you personally done if any?

I've done a lot of malwares in the past years. Mostly sold on other forums. Malwares related with Crypto, DataStealers, KeyLoggers, Discord Worms, I can show more in private messages.

Why do you want to join the PinkLSZ Developer Team?

I want to join PinkLSZ Developer Team because I consider myself a developer and I like to code and help others by giving ideas or just correcting code. I'm used to work with more people as a team, so teaming up will not be a problem at all.

Please list any portfolio/github links you'd like.

I don't post a lot of things on github, I just use it to star interesting projects and store files in private directories. [My github \(click me\)](#).

Dragonvixs - August 11, 2022, 5:31 am

What language(s) do you have experience with?

HTML,JS,CSS,python

What projects have you personally done if any?

One current projects is currently being sold on the HF marketplace. Recently I have been working on some big ideas but I haven't been able to work as much as I used to due to trying to add C# knowledge in my life right now.

Why do you want to join the PinkLSZ Developer Team?

I want to envolve and share knowledge with like-minded individuals. Chatting with those with the

same passion and interests as me keeps me motivated!

Please list any portfolio/github links you'd like.

captn_nemo - August 14, 2022, 2:05 pm

Hi Team PinkLSZ, my name is Captn_Nemo and I am very interested in joining you.

I have been working in the software industry since I was 18 and am currently a DevOps architect.

What language(s) do you have experience with?C#

Ruby

GoLang

NodeJs

Python

PHP

Swift/Objective-C

What technologie(s) do you have experience with?Linux

Kubernetes

Docker

HAProxy

NGINX

Redis

MySQL

MongoDB

ELK Stack

Prometheus/Grafana

Windows

IIS

Exchange

What projects have you personally done if any?

Indoor GPS System

I have built an Objective-C app that can determine the position in the apartment using 3 Bluetooth beacons.

The calculation was done with triangulation and trilateration.

Search/Index Plugin for CMS

I have built a Ruby plugin for a CMS which indexes pages and content with Elastic Search and makes them searchable.

MessageSecure

I have built a privnote clone with Go.

Messages can be entered which are then encrypted. The generated link serves as a key and can be opened once, then the message is deleted from the server.

[Project Link](#)

Why do you want to join the PinkLSZ Developer Team?

Unfortunately, since I've been working as a DevOps, I've had very little to do with programming. Software development and everything that goes with it is my passion. I love my profession.

I believe that you can only get ahead in life/profession if you reach your limits and that happens when you try new things.

I hope that if I can join your team, I can work out exactly these new things together with you. To go new ways, try new things and create cool things.

Please list any portfolio/github links you'd like.

Source code and Github link I'm happy to share privately, but since these are related to my real name, I'd rather not disclose them here.

grainy - September 8, 2023, 3:11 pm

Looking to recruit more developers. Submit your applications (for all the 5 people that see this).

Stanley - September 9, 2023, 10:28 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Have the drive to want to create something
No deal disputes

Please use this thread to apply using this format:

What language(s) do you have experience with?
What projects have you personally done if any?
Why do you want to join the PinkLSZ Developer Team?
Please list any portfolio/github links you'd like.

Please note that the main requirement after you join is contribution. This means that you, at the minimum, have to contribute to conversation.

What language(s) do you have experience with?

JavaScript/TypeScript, C#, PHP, Ruby, and Go predominately. Comfortable in others, including Python and C++, but not my first choices to go to. Learning Rust.

What projects have you personally done if any?

I don't have much to discuss in this aspect, as anything here would just dox myself. I've been a professional developer for some 15 years though. I've mostly been in the web development space, but also been on and lead internal tools teams.

Why do you want to join the PinkLSZ Developer Team?

I'm mostly looking for more chances to connect with other developers here on HF. There's less and less activity in the general forums these days, so a group like this is more opportunity to have those conversations. And I think it could be fun to jump into some projects as they come up.

Please list any portfolio/github links you'd like.

My [HF-branded Github](#) is linked in my profile here, though it's effectively empty. Only thing that's really there is a signature generator I wrote for The Brotherhood (the first one, not the current) some number of years ago, that I pushed to Github when the new group came about, so they could use it too. There's a lot of random code excerpts I wrote or fixed up for people over the years on [Pastebin](#). That's all ancient crap though.

Cunt - October 14, 2023, 3:41 pm

What language(s) do you have experience with?

I have alot of experience with C# (did a 4 year minor on gamedevelopment. mostly in Unity). After that i started expanding to full stack development since gamedevelopment didn't really peak my interest. Got into Python for automation and currently learning Node.js and react. Started getting back into full time programming about 2 months ago. Still alot to learn.

What projects have you personally done if any?

I've done a few personal projects with automation, Most of them i don't want to discuss in public. Made alot of games during my studies. Currently having a big project going on that i would like to discuss in private but also not in this thread.

Why do you want to join the PinkLSZ Developer Team?

I would love to join a team with people that are like-minded and share the same interests as i do. Also i think that we can learn alot from each other and grow as developers. Don't have alot of people to share this passion with at the moment. Also would like to expand my network of developers and this would be a good oppertunity to do so.

Please list any portfolio/github links you'd like.

These are all outdated and honestly not worth sharing. As i said before i'm getting back into the field since 2 months and i would hope to have something to share soon. Not on the level yet where i have a good portfolio :).

Dirty - October 16, 2023, 6:46 am

What language(s) do you have experience with?:

Golang, Python, Rust and did some work with eBPF

What projects have you personally done if any?

mostly toy projects, basic UTXO blockchain, working on a decentralized file storage concept. Recently founded an AI startup with a co-founder, working on LLM agent infrastructure. Together with him also worked on projects like a working KV store written in Rust

Why do you want to join the PinkLSZ Developer Team?

I'm looking to take my skills from toy projects to something more intresting, and have been recently looking for a group of people to do this with.

Please list any portfolio/github links you'd like.

Upon request I can share it in messages.

penxen - December 9, 2023, 9:27 am

Hello Edge and possibly other recruiters!

Applying here after I got a suggestion from you on my introduction page.

Hoping to hear from you! (:

What language(s) do you have experience with?

My most proficient language is C# in .NET, that's where most of my education has went into. I dabble in Python and have done simple projects using C++ and JS.

What projects have you personally done if any?

For work I do more regular web apps using blazor, asp.net core apis, database - that sort of thing.

For my personal projects I like to do some automation software either with .NET or Python.

An example would be a mod downloader to essentially bypass paywall (waiting 30s).

I've made a bot in an mmorpg to automate crafting - this was some years ago

And some other smaller similar projects, these are just the ones that came to mind.

Why do you want to join the PinkLSZ Developer Team?

I feel like this would be an opportunity to grow for me and at the same time be part of something that I can contribute to, I have a lot to learn in my opinion and that's what I love doing.

Please list any portfolio/github links you'd like.

I don't have a very showy portfolio or github, I mostly just use it to store some projects privately and that's mostly it. I can try to dig up some projects to show if there's something you'd like to see or

make a repo public.

SIM-5455545 - December 9, 2023, 6:07 pm

nonchalantly i would join and offer discount service to members and host giveaways from success being a dev.

Brasil - December 10, 2023, 3:34 am

Linux/BSD management (VPses etc.) and "cloud" management. Self-hosted things etc. C and Lisp dev. Looking to do something cool and make a little money, work in a team. I've worked on a lot of *nix utilities and some substantial Common Lisp projects which I won't share publicly right here on HF.

In my experience the most straightforward way to make money online period is to have a little gang work hard on something.

Good luck to all new applicants. I have some projects up my sleeve to hopefully get some Pinkies on board.

h0lybyte - December 14, 2023, 4:32 am

What language(s) do you have experience with? PHP for almost two decades, Java (runescape private servers), C# (unity), Rust (just started) and some other languages. Also getting back into python recently with this mL wave.

What projects have you personally done if any? Gotta be careful what I can post here but I try to leave them on GitHub.

Why do you want to join the PinkLSZ Developer Team? I am looking for a project.

Please list any portfolio/github links you'd like.

Sure my profile is github.com/h0lybyte

Currently working on github.com/kbve/kbve, which is a monorepo that is in my CRAP stack (C#, Rust, Astro, Python).

The backend is a Rust / Nodejs API, front end is Astro with Svelte / React! I also have a WebGL unity game in the monorepo.

Side note, the monorepo does automatically build and deploy the rust backend as a docker container inside a docker swarm. It also builds and deploys the unity game and front end websites too.

Mr. Monkey - December 16, 2023, 4:13 pm

What language(s) do you have experience with?

webdev (fullstack), c++, python, go

What projects have you personally done if any?

- Reversing a famous poker client and creating cheats for that client
- 3 mobile apps

Why do you want to join the PinkLSZ Developer Team?

Just quit my webdev day job after 6 years and looking for interesting projects

Please list any portfolio/GitHub links you'd like.

Will give it in private, I prefer not to post my GitHub here ...
