Thread: [Free DMCA Ignored Hosting \[Russia\]](#)

MentorPEN - July 12, 2022, 4:45 am

Providing free Russian web hosting, as previous nodes were all sold out, we couldn't provide test copies as asked for vouch. And now this time we got a few free RU nodes to provide free DMCA ignored hosting!

Total free accounts left :- 60

P.S. Only DMCA will be ignored, this is not bulletproof hosting. Shared hosting cannot be bulletproof with public dns servers. Fastflux not installed.

How to claim this DMCA ignored web hosting for free?

First go to the link bellow, and select the DMCA Package RU and then select "TERM - 6 Months". Then click on the COUPON tab and enter the coupon code i1i1Wu5D and that will give you an invoice total of \$0.00, after which click on checkout, and put your username and domain and you are done!

https://aiikm.org/blesta/order/config/index/bulletproof/?group_id=4&pricing_id=11

Private Message me the email you used while registration, doesn't need to fill in your real name, package will be approved instantly.

Don't forget to rate the sales thread and leave a signature of approval. You can find the thread link in my signature.

(You can ask for basic support via Support system or Tickets! Do not hesitate to ask for it)

Good luck with sales!

No, this will run until the whole dedicated server is full! It is a 48 GIG machine with 1.5TB SSD so making use of it, and will help others who want to get away from the dmca infringements. Plus, will also receive some ratings on thread from them too!
