Thread: [USB-c hub with switcher button?](#)

skull - July 13, 2022, 5:45 am

Does anyone know if there is a USB-c hub that includes a switcher button.

Use case:

I have these 2 MacBooks on my work desk, and I recently upgrade with one set of monitor and keyboard.

Currently I keep plugging the HUB out of one machine to the other machine in order to continue to use the setup.

I don't have space for two monitors and keyboard at this time, so was thinking if there was a hub that supported a click-switch to easily change between the output.

Something like this should be what you're looking for:

Check this out. No hardware necessary to share peripherals between two computers.
