Would this work for FiveM?

Hi, this software would surely take care of spoofing your HWID's, but it's not directly configured for FiveM and would not do the following required to successfully bypass FiveM:

- Change your IP address
- Clean any trace files related to FiveM

This tool does have the ability to do the following:

- Spoof all of your HWID's
- Create new user account with elevated rights
- Change your network MAC address

Although, I will look into adding the required features for FiveM in the future, so feel free to check back if you're only need is FiveM!

Thanks! I will definitely check back in the future.

Is it an active spoofer than you need to run constantly or is it a "One time spoofer"?

Your HWID's will be reverted back to their original state upon rebooting your computer. The spoof is not permanent.

Would it be possible to code in an option for a permanent spoof?

Possible? Sure. But, why would you want to permanently change them?

Let's say I have a HWID banned PC,

Instead of constantly using a HWID changer whenever I want to play, I could just change it once and that's it,

You should totally add that into the program as a option

"Temporary Spoof (Until restart)"

"Permanent Spoof (Will break any cheats HWID checker)"

Right, but then you would be right back in the same predicament once the new HWID got banned. Unless, you're intentions are to change your ID's and play legit as to not get banned again.

Correct,

This would be a great second option for those that want to step away from cheating for example (Me myself is one of them because BE cheats are getting a bit to expensive for me to fully enjoy the cheating part of it and I am quite sure my HWID is already logged so in my case I would rather step down and change it permanently to not get a random hwid ban in 4 months)

Ah, yes makes sense. While it's possible, in a few ways, this specific product does not provide permanent spoofs. Should I release one at a later date, I'll let you know!

Mercenary - July 22, 2022, 10:56 am

MercSpoofers 2.0 has been released. Prices remain the same. Vouch copies still available.

Astonished - July 22, 2022, 11:10 am

How long would a vouch copy last for testing? I'm highly interested in HWID spoofers all the time and am active at cheating across most popular games. Also was a support member in a cheat-selling discord. Obviously picking who tests it is your own discretion but I would definitely be able to test across many AC's as I'm HWID banned on most games lol.

Vouch copies typically are 24 hour licenses. If you would like to test and provide a review, you are more than welcome. You can add my Discord which is located in the thread. ?

This is the sexiest spoofer in the game.

casperr - July 22, 2022, 5:11 pm

working for fiveM ? because they patch every spoofer

It's not currently working for FiveM.

A big vouch for Mercenary. Solid product and great guy. He provided me with a vouch copy and walked me through a few steps to ensure I was getting the most out of the spoofer. I've tested his spoofer on a couple EAC and BE games and can confirm the spoofer is working flawlessly.

Any idea if this will work for warzone? My PC is already HWID banned so wouldn't mind giving it another go

Warzone is protected by Richochet, which this is only tested and confirmed working for EAC (Easy Anticheat) and BE (BattlEye).

Mercenary - August 27, 2022, 11:48 pm

MercSpoofers has been updated to version 2.1.0.

This update has improved the spoof for EAC protected games and Windows 11 is now supported.

so I want to play legit fortnite

I want to quit cheating

is there anyway your spoofer fixes that?

perm would be great but if not its fine

Rand0nn - September 3, 2022, 4:59 pm

Looks impressive, might consider purchasing this in the future.

There is not currently an option to permanently spoof, but that is being worked on.

SIM-4852554 - September 4, 2022, 7:29 am

So I was banned on fortnite

and this got me unbanned, I cant wait for a perm spoofer!!

albuainain - September 30, 2022, 11:15 am

Bought this spoofer and it works great, thanks for great support and fast response.

regards,
