edit: sample post on reddit: <https://www.reddit.com/user/bombabey>

In it, I will talk about the system where you will get automatic earnings using applications such as python, reddit, telegram and discord. I have been using it flawlessly for more than 1 year.

?All you have to do is follow the Steps carefully.

Used programs

Excel (where we will keep the data)

Thonny (python program)

Desktop telegram application.

The desktop discord application.

I discovered the system by a reddit user I've been following for a while now. He's making huge money with a bot. The thousand dollars I'm talking about here will be an ear for him.

Let me briefly talk about the operation performed;

The content we have obtained from several telegram channels.

<https://publisher.linkvertise.com/ac/162827> using the named site, we turn it into a short link. In order to access these links in users, they have to watch linkvertise's ads. In this system, publisher, that is, allows content publishers to earn a considerable amount of money.

How do we do those who have not used link shortening services before? those who are worried about how we will get on top. Don't worry, I'll tell the idiot as I will.

I will give step-by-step visual explanations if you apply this part completely. The system works flawlessly.

?By the way, the cost, as Dec, is just the effort spent and the electricity bill.

My achievements :

Here are my recent earnings -> <https://i.hizliresim.com/szvspbi.jpg>

My average daily earnings - > <https://i.hizliresim.com/elgnzxs.jpg> It says above that my monthly earnings are \$ 587.

deccount: <https://www.hizliresim.com/gzjp02p>

Method Price: \$50 (I saw that many friends were having trouble with money, so I didn't set the price high)

I am using hf contract or escrow.

Lots of Winnings...

[contract=tid]Start Contract[/contract]

Note: I Get Paid in Crypto

Hi,

As i understand you are using a bot to get traffic to linkvertise? Something similar that Snoopti has been sold before and it was a scam.
