Thread: [Lessons On How to Make Money With Adsense - Vol1](#)

c4usader - July 14, 2022, 9:40 am

Hello friends. I will touch on the topic of making money from Internet sites. Of course, first of all, your domain name must be adsense approved. I'll tell you about the Adsense approval issue in another topic.

... we can create sites in industries (which have become very popular now), add adsense ads to the site from here (I will also explain the ad placement incident on different topics), attract visitors to the site from social media and earn money. I will add the screenshots I have earned myself to the end of the topic as evidence.

I'll tell you in the case of substances ;

First of all, we have received our adsense approval

We have translated the site content according to certain sectors.

English German or Russian may be used as the site language.

Bots handle the content business. (after approval, the content is even if it is not original) after shooting content close to 1k, we start social media shares.

The issue of how to make pictures original is important here; there are plugins for this, etc.

As an additional income, October door to extra income is opened with an abbreviation in the on-site links.

I put it roughly this way. Based on their subtleties, let me summarize them as follows:

Wordpress will be used as the infrastructure.

[*] We are comfortable with the fact that there is a spinning event in the content bots.

[*] Pictures will not be shared without being authenticated.

[*]We have added ads where will we pull the hit to our site [from Social Media]

[*]The cake is very big if you really work hard, you can earn beautiful figures in a short time.

A few sectors I can give you for now:

Program download site

PDF's download site

Html 5 gaming site

Stay on hold for the rest of the article..
