Thread: [E-Commerce Full setup/mentorship || Make bank](#)

I'm offering a service to help you fully set up an e-commerce store.

Instead of buying an e-book claiming to make you rich, this is something that you can actually scale and make large amounts of profit from.

What I'm offering:

- Niche brainstorming/finding a profitable product.
- Will teach you how to dropship unless you want to hold stock/create a brand.
- Full store setup with 120 days free Shopify trial.
- FB Ads setup and I'll teach you how to make them the most performing also how to analyze results.
- TikTok ads setup and I'll teach you how to analyze results (product dependent, some products do better on Facebook than on TikTok)

Please contact me if you are interested, I'll let the first 3 customers do this for 100\$. After that the price will be raised to \$250.

Please note: You need some sort of capital to start with, ideally over 400\$. If you have a weekly income also, that is best. You also need to be 18 and over to use payment processors such as stripe and paypal.

Seems I can't upload photos when on my phone or gifs. If you PM me your discord I can show you some proof, most recent store is 150\$ sales first day and a half.
