Thread: [\[IMPORTANT\] Today i have been cursed by a dark wizard. \(Serious post\)](#)

Hackforums we have a problem, a warlock has appeared.

[K l a u s](#) performed black magic on me and asked me \$2k in btc. If i didnt he would "make me endure the worst hell where time doesn't even make sense." That is why i am crowdfunding through hackforums to save my life, and also his, if you make a donation we can get this kid some help and pay for his psychiatric treatment.

Here he showed proof of the dark ritual:

The dark forces are already spreading on hackforums as various members have received negative rep from this user in unexplainable ways.

I advice you guys to go see your priests ASAP
