Thread: [Import multiple pictures into multiple pictureboxes](#)

john ronaldsad - July 18, 2022, 11:23 pm

Hi, I want to import a folder of images (up to 45) into a layout of pictureboxes. I know how to import one picture into one picturebox but I have no clue how I would import a folder of images into a bunch of pictureboxes. Any and all help is appreciated!

I'm getting an error

Code Non-invocable member OpenFileDialog. "FileNames" cannot be used like a method

```
Code    private void Button1_Click(object sender, EventArgs e)
    {
        for (var x = 0; x < openFileDialog1.FileNames.Length; x++)
        {
            string Path = openFileDialog1.FileNames(x);
            switch (x)
            {
                case 0:
                    PictureBox1.Image = Image.FromFile(Path);
                    break;
                case 1:
                    PictureBox2.Image = Image.FromFile(Path);
                    break;
                case 2:
                    PictureBox3.Image = Image.FromFile(Path);
                    break;
                case 3:
                    PictureBox4.Image = Image.FromFile(Path);
                    break;
            }
        }
    }
```

HFDone - July 20, 2022, 7:45 am

```
Code // OpenFileDialog openFileDialog1 = new OpenFileDialog(); // if you didnt add
private void Button1_Click(object sender, EventArgs e)
{
    for (var x = 0; x < openFileDialog1.FileNames.Length; x++)
    {
        string Path = openFileDialog1.FileNames[x]; // Change
        switch (x)
        {
```

```

        case 0:
            PictureBox1.Image = Image.FromFile(Path);
            break;
        case 1:
            PictureBox2.Image = Image.FromFile(Path);
            break;
        case 2:
            PictureBox3.Image = Image.FromFile(Path);
            break;
        case 3:
            PictureBox4.Image = Image.FromFile(Path);
            break;
    }
}
}

```
