Thread: [Call-ID Spoofing | Setup or Website](#)

1nf4m0u5 - July 25, 2022, 8:37 am

Hello ?,

Is there someone that could help me to Setup an VOIP-Server or know's a Website which still works ? [Best with Anonymous Payment-Option's like Bitcoin]

I used a long time Premiumzize and CallwithUs but they changed their system Dramatic. Now i try to make my Own or find a good working one. ? [Already got an Raspberry-PI with FreePBX installed, pretty sure Asterisk is also in good shape but good some Error's. Also a SIP-Trunk called Telenyx]

Calling mostly in Europe, From Germany and Switzerland. ?

Budget not over 150€ BTC ?

Would be great if you could help me <3

Best regards

So if you have pbx and sip trunk, what you require? i dont get your point where you need help, you have everything to use it.

if you want to setup siptrunk on your pbx let me know

And how do you go about anonymity, so they wont be able to trace back where the setup is located and calls are being made?
