The method is outdated and killed, it does not work the way he describes it, it is by far impossible to achieve anything with this method, i have spent 10 hours trying to make it work, but its impossible and i have not gotten a single victim lol and my crypts are good.

His sales thread is is luring people with fake lies, the method is non functional, he should close his thread and he knows that.

His method basically is [deleted].

xVulnerable advices to [deleted]?

xVulnerable advices to use the manual part of the method, which is "PLAYING the game and making friends on that game and get them download the stub". How the hell is he allowed to sell such garbage? Play the game make friends and when u finally gained their trust, send them virus? Are u joking? Is this what HF has turned to? If this dispute wont be closed in my favor and his thread wont be removed, im opening my sales thread and im gonna sell same shit he sells(air).

At first look i thought this method is great, straight to the point no 500 pages gibberish, but what a disappointment.

This is generally what to expect when you buy 'hacking methods" from the most public "hacking forum" in the world.

So in your words what your saying is, that we can all go on marketplace and sell a "dream" to each other? This is absolute scam lol, how can he sell garbage and get away with it? ? Theres loads of other forums known to public, wwh, exploit, verified why theres no shit show like theres here? On exploit you got an open dispute your thread is marked, everyone who visits the thread can see it and mods act fast there, seller doesnt resolve an issue. gg bye kicked off, what the mods doing here? why such shit is even allowed to happen? ?

Don't compare HF to other forums. HF is unique in its own way. And is WAY WAY better than other forums out there.

It is CLEARLY SAID in the RULES that ALL DEALS are at your (BUYER) own risk. HF does not interfere in the deals. If you don't agree with those rules, don't do deals here, simple as that.

And the content here is quite High Quality as well. Not everything is shit. You just have to be careful and buy after doing thorough research that's about it. You can't blame a whole forum for a bad deal you have had with someone.

If you purchased a product from someone and you think you aren't getting what you paid for, open a dispute AND/OR try to resolve it out with the seller.

Don't expect anybody to take any actions, I would also advise not trying to insist on that route cause that might actually get you banned if you start spamming admins/omni about it.

This deal dispute and the negative rating is as far as you'll go, sadly.
Yeah this forum has deffo turned to garbage lmao

Not even gonna save that shitty eBook for myself, lol.

You're from 2009, no need to get your account closed, stick around but keep your money in your wallet.

Good luck in the future.

NotKover - July 26, 2022, 9:56 am

Sorry for your lose OP, if that is his method he is selling im sorry you were sold such a old install method

Senior - July 26, 2022, 9:58 am

I understand the dispute but why release info on his paid material, this is similar trashing his project??

Just ask for the money back no need to attack the method, maybe it requires an additional missed step??

Most hacking tools require sandboxie or old versions of software, etc just so yk, current 0days are uber rare....

Gary - July 26, 2022, 10:05 am

LMAO this man really posted the whole ass method
