Thread: [GTA V Mod Menu Recommendations ?](#)

Hello there,

How are you?

The last time, I used a mod menu, was from "gta elite", but they are gone.

Now I'm just looking for another legit provider..

Do you know any?

Thanks!

The only menu I've used were Safety & Extortion, which is paid. Safety froze on me occasionally. I think you're better off with a mod loader instead.. FYV7, Omar Ghost, Verticals, or Godly are good ones.

A couple of my friends starting using Cherax. It seems interesting.
