Is this some other product than the one you were selling earlier?

It seems to be exactly the same thing just a new thread.

Bustabit is a gambling site. Gambling sites are mathematically designed to inevitably win in the long run regardless of your strategy unless there's a bug on their side that you're abusing (like rounding).

Either you're selling a script for the customers to have fun with but they cannot win in the true long run or your script is abusing some bug. If it were the latter then I can't imagine why anyone would sell it for 50 bucks if it actually works?

The term "long run" of course depends on your risk strategy but it will happen.

Hmm okay.

This did not stop you from posting them on your last thread and then taking them down when I pointed out that they were not doing so well and claiming that you did manual betting.

The point being that just having your word for it is not really proof of this script being as good as you say it is. ?

Anything you were able to "uncover" from my last thread was small amounts of bits running , run this thing with 10k and you'll never lose .

Over 10k or around 11k is enough to sleep and run this 24/7

I run double the recommended bet for twice the profit with 22k balance , all night long for a few
times.

A few questions as usual:

1. Why would you waste your time for a small \$50 if you can run multiple of these instances and make hundreds per day?
2. You know gambling methods simply don't work and will be doomed at some point, right? You'll lose sooner or later after a few failing streaks.
3. If you made so much money from this, why didn't you bother to get some designer to create you a sick thread design for \$50 instead of using this ms paint-ish design?
4. So what if your script fails to recover during this dip and ends up with further losing streaks:

So you are promising users that it can run 6 months straight without them losing their investment?

You're saying they can win back the amount they paid for this "method" in 1 day. This would mean they can earn \$50 a day, meaning they can make \$9000 in 6 months. Do you agree?

Havockas - August 18, 2022, 3:45 pm

It reminds me Martingale Roulette Strategy, if you lose you double it or triple it. Even you can see on his chart betting everytime 2bits once he loses makes 28 bits and if he loses again bets around 318.

If you won't have enough balance you will be busted to cover losses

With this script you could survive MAX 4 losses unless you're risking a huge bankroll and even then you could maybe survive 1-2 more.

Correct this can be proven by checking the provided username I sent ya and that username never stops the bot and it bets twice the recommended amount of bits that i would suggest.

So i think you will be alright betting what you are with that amount.

Which is why I don't bet to lose more than 10k , which can be made back very fast. It took a pretty long time and he shouldn't have had his script set to lose anything over 25k why risk the entire profit and more simply to get back to where he was in 1 bet . This script works with extraordinary profits and if only 10k was lost than it would be no time before he would have been back to an all time high. Script works great just must use it wisely.

yes. right. i have seen as much as 20, 25 reds in a row. those would bust any script, even if you use 1 bet. Unless the script has some kind of pause or skip mechanism that would skip the games. But this script is very basic, it doesnt have any safety features such as to skip games after x amount of red streaks, to randomly pause, etc...

Do you know what house edge is? Or are you knowledgeable and preying on the people dumb enough to fall for it?

Edge of Nowhere - September 4, 2022, 7:59 pm

There's literally NO strategy that will win in the long run, just luck. I've been there for over 5 years and tried it pretty much all. Martingale, Paroli, D'alembert, Fibonacci, Labouchere, custom scripts, random sleeps, random bets.

The rolls aren't predetermined as they claim they are. There's literally always 1-2 high rollers at most, never more. Those are just bots to hype up the chat. The only way to win is my either scamming people, rain farming or being one of the luckiest motherfuckers on there. Like that 1 guy who bet 1 bit on 999,999x, yeah that seems legit... That's totally not the owner scamming the investors. Speaking of investors, they take the hits if the house loses. The owner pays mediocre % to investors.

So in the end, if the house loses, investors lose. If the house wins, players lose. The owner literally never loses any money.

"In the last 365d, bustabit's profit has been 706.68 BTC"

House always wins.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
