I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

(Aug 7, 2022 09:57 PM)Laughing Man Wrote: [\[CITE\]](#) Ziltz are you still selling cheats that you can't keep UD and then end up basically screwing over your subscribers like you did in Counter-Strike? No idea who you are. Our cheats are fully undetected and have been for a long time now.

I presume you're not a subscriber as you would already know the answer to your question.

(Aug 8, 2022 02:02 PM)Zlitz Wrote: [\[CITE\]](#) Holy fuck 7 years ago?? I bet you keep grudges on VW with the diesel shit too? Everyone back then got refunded, and people are allowed to make mistakes. Some by me and some by the developer at that time. Thankfully things are.. well.. a bit fucking different to 7 years ago lol.

Thanks for bringing up some history, made me happy to see how far I have come now.

If you join Elocarry you'll think it's a different person ;)
If you steal once, you'll steal again.

Dishonesty isn't a forgotten behavior and yes people are held accountable for their actions, there is no Undo button. You can not erase the past and people have a right to know the prior behaviors of who they might do business with.

Ironically enough you say it's undetected for 190 days but less than 60 days ago you were looking for a coder to help you.

Ziltz you've been exposed as someone who can't be trusted, who has a history of lying, cheating, and ripping people off.

Regardless of if the post is 7 years old, it's a pattern of behavior. It's something everyone should be aware of before doing business with you.

You outright LIED to people about ESEA proofing and got a BUNCH of people banned, then lied about it and tried to defend your dishonest practices, that's not the behavior of someone admitting they did wrong or trying to make it right and when you lie don't be surprised when people choose to not trust you.

We are always hiring new developers what are you talking about lol? We currently have 4 on payroll all doing different games?!

I predicted that a banwave will happen soon! Wasn't expecting it to be that soon!

Either way, Elocarry is untouched and fully undetected. Surviving the banwave and striving forward.

Elocarry Update:

We are looking to bring more value to all of our subscribers and continue to be the safest in the

market.

We are now officially 250+ days undetected!

Skin changer is no longer exclusive to Elocarry+ subscriptions. Meaning everyone can now use our skin changer feature without paying more.

We have reduced our pricing structure. (Will only impact those in 0% VAT areas.)

We have added a one-day trial option. You can only redeem this once you are a verified member.

Our loader has improved. Use to take three steps to set up, now only takes one.

Cheat Update:

We have reworked our Cassiopeia! Added 360 Cassio as demonstrated in this public [video](#).

Added R whitelist options.

Added Q and W poisoned checks.

Re-written the combo logic.

Brand new features for lane clear and farming.

Laughing Man - October 10, 2022, 1:12 pm

I'm shocked people still play this game, soon they'll have the Riot Rootkit for this game and it'll be rip.

Zlitz - October 18, 2022, 12:27 pm

Updated to the latest version.

Zlitz - October 25, 2022, 3:35 pm

We are happy to announce that we have hired a new lead developer.

Xaxup is known for his crazy scripts with really in-depth logic from platform BGX.

Stay tuned to see new scripts from him soon!

Zlitz - October 27, 2022, 4:50 pm

Update

Déjà vu..

We are happy to announce that we have hired another script developer from BGX. Levvi is known for the most used Varus script, Kog'maw and overall polishing up the edges of a script.

Expect crazy scripts and general logic to be improved across the board.

Is there any chance of a Hardware ban? I know your program is undetected but in the future if it does, does riot do HWID bans? Or will the account just be suspended?
